

**Concept-Development
Practice Page****9-1****Work and Energy**

1. How much work (energy) is needed to lift an object that weighs 200 N to a height of 4 m?

800 J

2. How much power is needed to lift the 200-N object to a height of 4 m in 4 s?

200 W

3. What is the power output of an engine that does 60,000 J of work in 10 s?

6 kW

4. The block of ice weighs 500 newtons.

- a. What is the mechanical advantage of the incline?

2:1

- b. How much force is needed to push it up the incline (neglect friction)?

250 N

5. All the ramps are 5 m high. We know that the KE of the block at the bottom of the ramp will be equal to the loss of PE (conservation of energy). Find the speed of the block at ground level in each case. [Hint: Do you recall from earlier chapters how long it takes something to fall a vertical distance of 5 m from a position of rest (assume $g = 10 \text{ m/s}^2$)? And how much speed a falling object acquires in this time? This gives you the answer to Case 1. Discuss with your classmates how energy conservation gives you the answers to Cases 2 and 3.]

Case 1: Speed = 10 m/s Case 2: Speed = 10 m/s Case 3: Speed = 10 m/s

Block on A reaches bottom first; greater acceleration and less ramp distance. Although it will have the same speed at bottom, the time it takes to reach that speed is different!

sufficient sponsorship income which was subsequently seen to have a detrimental impact on the project's success. The Committee feels that Government needs to put in place a system that can deal with major financial commitments at short notice. In hindsight, the development of the lander and orbiter separately is seen as wrong, impeding the flexible coordination of the mission, leading to tensions between the Beagle 2 consortium, ESA and other contractors. Further, there was a lack of coordinated oversight between these three groups and therefore a failure to identify important weaknesses in the mission. Despite the failure of Beagle, the Committee does see some positive potential for future projects, both in scientific and educational benefits, but that the costs of such projects would benefit from greater participation by other organizations.
