

Technology and Negative Effects

✓ Exclusively available on IvyPanda

The development of technology has drastically changed the world. As people are unable to calculate the rates of progress, it is impossible to determine what changes will be brought about with an even greater increase in technological advancements. Modern technology would seem futuristic to someone thirty or even twenty years ago. Primarily, the whole question of the change in technology is very questionable.

Previously, humans were not able to achieve this sort of breakthrough and then, within a very short amount of time, technology came to be. Many people question whether it was a natural evolution or humanity had some help from some other form of alien life. But no matter how it came to be, technology is presently taking over the lives of people and natural existence. There is no way to get rid of evolution and so, people must learn how to control it and predict what will come next.

The biggest question is that sometimes the problems overtake the benefits of technology. This closely relates to the social media and all the out coming issues. Primarily, there is the safety concern, as the information used in the social networks can be used by the advertisement websites. Even though there are safeguards that try to prevent personal information from being shared with other institutions and sites, there are still some ways that information gets out.

"Facebook" has been one of the sited networks that is widely used by people, but has compromised some private information. Even though the damage has been done, the site has adjusted its policies to better suite users (*Network Security* 2010). Another issue is that people who share information online cannot really control who can access their web page and browse their personal information.

Anyone can leave a comment and become involved in a group of friends. This leads to many concerns, but people are still not aware of the security issues. The unfortunate part is that people do not pay attention to the growing concern and continue using the social networks. It has become so popular that individuals feel to be required to upgrade their social status and produce information that can be acknowledged by others.

Another disadvantage is faced by educational institutions in the possibility of students using the online society without any control. The unauthorized use of online
