A Political Economy of Contemporary Capitalism and its Crisis Dimitris Sotiropoulos,John Milios,Spyros Lapatsioras,2013-06-19 The recent financial meltdown and the resulting global recession have rekindled debates regarding the nature of contemporary capitalism This book analyses the ongoing financialization of the economy as a development within capitalism and explores the ways in which it has changed the organization of capitalist power The authors offer an interpretation of the role of the financial sphere which displays a striking contrast to the majority of contemporary heterodox approaches Their interpretation stresses the crucial role of financial derivatives in the contemporary organization of capitalist power relations arguing that the process of financialization is in fact entirely unthinkable in the absence of derivatives The book also uses Marx s concepts and some of the arguments developed in the framework of the historic Marxist controversies on economic crises in order to gain an insight into the modern neoliberal form of capitalism and the recent financial crisis Employing a series of international case studies this book will be essential reading for all those with an interest in the financial crisis and all those seeking to comprehend the workings of capitalism

Socio-Religious Revolution in India Pankaj Jain,2016-12-19 Scholars have long noticed a discrepancy in the way non Western and Western peoples conceptualize the scientific and religious worlds Non Western traditions and communities such as of India are better positioned to provide an alternative to the Western dualistic thinking of separating science and religion The Himalayan Environmental Studies and Conservation Organization HESCO was founded by Dr Anil Joshi in the 1970s as a new movement looking at the economic and development needs of rural villages in the Indian Himalayas and encouraging them to use local resources in order to open up new avenues to self reliance This thoroughly revised text argues that the concept of dharma the law that supports the regulatory order of the universe in Indian culture can be applied as an overarching term for HESCO s socio economic work This book presents the social environmental work in contemporary India by Dr Anil Joshi in the Himalayas and by Baba Seechewal in Punjab combining the ideas of traditional and scientific ecological knowledge systems Based on these two examples the book presents the holistic model transcending the dichotomies of nature vs culture and science vs religion especially as practiced and utilized in the non Western society such as India Using the example of HESCO the book highlights that the very categories of religion and science are problematic when applied to non Western traditions but that Western technologies can be radically transformed through integration with regional legacies to enable the flourishing of a multiplicity of knowledge traditions and the societies that depend upon them It will be of interest to students and scholars of South Asian Studies Religion Environmental Studies Himalayan Studies and Development Studies

Building Something Better Stephanie A. Malin,Meghan Elizabeth Kallman,2022-04-15 Showing that it is possible to challenge social inequality and environmental degradation by refusing to continue business as usual Building Something Better shares vivid case studies of small groups who are making a big impact by crafting alternatives to neoliberal capitalism It offers both a call to action and a dose of hope in these troubled times **The Soils of the Philippines** Rodelio B. Carating,Raymundo G. Galanta,Clarita D. Bacatio,2014-04-23 The first soil survey in the Philippines was done by Mr Clarence

Dorsey an American soil scientist in the province of Batangas in 1903 The Soils of the Philippines however is the first comprehensive summary of more than a century of soil survey work in this country It integrates the soil concepts of the reconnaissance soil survey results which commenced as early as 1934 and continued until the mid 1960s with the semi detailed soil surveys that continue to this day The result is the first ever genetic key for classifying Philippine soils at soil series level thus making it possible for any newcomers to the soil survey field to confidently produce their own soil map at a more detailed map scale to suit the project requirements This book brings together discussions on soils and soil mapping units and up to date international techniques and technologies It makes soils relevant to current political realities and national issues As soil survey moves from a reductionist agricultural development planning tool to a more holistic and integrated approach to enable us to understand our dynamic and complex environment The Soils of the Philippines will be the only source of authoritative and updated data on soil resources for macro level resource management planning for decades to come With a vanishing breed of experienced soil surveyors not only in the Philippines but also worldwide it may remain the only book on Philippine soils for the next hundred years or more Since soils follow a geological and not a human time frame the contents of this volume will stay relevant for soil surveyors even in a fast changing world As the country leaps from an agricultural economy towards modernization and a more diversified economic base some of the soil series in the Philippines for example the Guadalupe series underlying the skyscrapers of Makati City are becoming extinct as a result of urban development Therefore this book serves as the repository for the soils that we possess the soils that have been lost through decades of urbanization while at the same time it creates a soil classification system for the soils we are yet to discover

Coercive Care Bernadette Mcsherry, Ian Freckelton, 2013-06-26 There has been much debate about mental health law reform and mental capacity legislation in recent years with the UN Convention on the Rights of Persons with Disabilities also having a major impact on thinking about the issue This edited volume explores the concept of coercive care in relation to individuals such as those with severe mental illnesses those with intellectual and cognitive disabilities and those with substance use problems With a focus on choice and capacity the book explores the impact of and challenges posed by the provision of care in an involuntary environment The contributors to the book look at mental health capacity and vulnerable adult s care as well as the law related to those areas The book is split into four parts which cover human rights and coercive care legal capacity and coercive care the legal coordination of coercive care and coercive care and individuals with cognitive impairments The book covers new ground by exploring issues arising from the coercion of persons with various disabilities and vulnerabilities helping to illustrate how the capacity to provide consent to treatment and care is impaired by reason of their condition

Research Handbook on Climate Change Adaptation Law Jonathan Verschuuren, 2013-01-01 The present book is a much needed publication on climate change adaptation law It is a collaborative effort of distinguished experts from around the world and adopts a holistic approach to adaptation taking a

global view with a focus on the international the regional and domestic levels This publication has a wealth of information illustrating the issue of adaptation with many examples from all over the world One of the most valuable aspects of this book ensuring that it will have a lasting value is that it discusses all fields of law which are vulnerable to climate change such as tort law insurance law disaster law marine law water law planning law construction law environmental law forestry energy law biodiversity The book also includes general issues of adaptation such as climate justice and the relationship between adaptation and development human rights in the context of migration law and compensation It is written in a very accessible language and will be an indispensable reading for both scholars and practitioners The content and structure of the book make it a definitive book on climate adaptation Malgosia Fitzmaurice Queen Mary University of London UK This book indeed will become the definitive text on climate adaptation law for the coming years From a global law perspective Verschuuren and his team analyse in an outstanding way the legal challenges and barriers to climate change adaptation and how they can be overcome Just like climate change this book is here to stay Kurt Deketelaere KU Leuven League of European Research Universities LERU Belgium This timely Research Handbook discusses the challenges brought about by the need to adapt to a changing climate It considers how adaptation is necessary to address impacts resulting from the warming of the Earth's atmosphere which is already unavoidable due to past emissions With adaptation policies around the world still in their infancy the book examines the legal challenges and barriers to climate change adaptation and how can they be overcome It brings together expert contributors to consider topics ranging across tort and insurance law disaster law water law marine law planning law biodiversity law green buildings pollution control displacement agriculture and energy With its transnational and multilevel approach the Research Handbook on Climate Change Adaptation Law will be an essential resource for academics in the field of climate change policy and law policymakers and other government officials working on climate change and NGOs working in the field of climate change

Handbook of Systems Engineering and Analysis of Electro-Optical and Infrared Systems William Wolfgang Arrasmith, 2025-06-30 There has been a lot of innovation in systems engineering and some fundamental advances in the fields of optics imaging lasers and photonics that warrant attention This volume focuses on concepts principles and methods of systems engineering related topics from government industrial and academic settings such as development and operations DevOps agile methods and the concept of the digital twin Handbook of Systems Engineering and Analysis of Electro Optical and Infrared Systems Concepts Principles and Methods offers more information on decision and risk analysis and statistical methods in systems engineering such as design of experiments DOX methods hypothesis testing analysis of variance blocking 2k factorial analysis and regression analysis It includes new material on systems architecture to properly guide the evolving system design and bridge the gap between the requirements generation and design efforts The integration of recent high speed atmospheric turbulence research results in the optical technical examples and case studies to illustrate the new developments is also included A presentation of new optical

technical materials on adaptive optics AO atmospheric turbulence compensation ATC and laser systems along with more are also key updates that are emphasized in the second edition 2 volume set Because this volume blends modern day systems engineering methods with detailed optical systems analysis and applies these methodologies to EO IR systems this new edition is an excellent text for professionals in STEM disciplines who work with optical or infrared systems It s also a great practical reference text for practicing engineers and a solid educational text for graduate level systems engineering engineering science and technology students

Corporate Strategy in the Age of Responsibility Peter McManners,2016-05-13 As the era of ever expanding markets and ample resources ends governments and business will have to behave differently The world is facing weak economic growth limits to affordable resources and increasing concerns about environmental consequences During the boom times governments championed de regulation and business responded by adopting an anything goes attitude In these straitened times strategic analysis has to engage with the challenges that society faces to create resilient corporations fit for the 21st century In Corporate Strategy in the Age of Responsibility Peter McManners who has for nine years run strategy workshops on the Henley MBA focusing on the global business environment sets about providing a strategic framework for navigating the new economic environment Chief Sustainability Officers CSOs now exist but they struggle to find the strategic rationale for the improvements they champion The author argues that their good intentions often lack traction partly because others in management don t get it but also because they are not ambitious enough The book is not about preaching semi charitable behaviour or how to enhance the reputation of the corporation instead it is about surviving and thriving in a challenging and changing environment A corporate audience familiar with strategy books will relate to this book but will find it steers them towards radically new strategic thinking suitable for a turbulent period of transition

Cambridge IGCSE® Combined and Co-ordinated Sciences Coursebook with CD-ROM Mary Jones,Richard Harwood,Ian Lodge,David Sang,2017-01-26 The Cambridge IGCSE Combined and Co ordinated Sciences series is tailored to the 0653 and 0654 syllabuses for first examination in 2019 and all components of the series are endorsed by Cambridge International Examinations Cambridge IGCSE Combined and Co ordinated Sciences Coursebook is tailored to the 0653 and 0654 syllabuses for first examination in 2019 and is endorsed for full syllabus coverage by Cambridge International Examinations This interdisciplinary coursebook comprehensively covers the knowledge and skills required in these courses with the different syllabuses clearly identified Engaging activities in every chapter help students develop practical and investigative skills while end of chapter questions help to track their progress The accompanying CD ROM contains self assessment checklists for making drawings constructing and completing results tables drawing graphs and designing experiments answers to all the end of chapter questions and auto marked multiple choice self tests

Living within a Fair Share Ecological Footprint Robert Vale,Brenda Vale,2013-09-02 According to many authorities the impact

of humanity on the earth is already overshooting the earth's capacity to supply humanity's needs. This is an unsustainable position. This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint. The authors describe numerical methods used to calculate this, concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation. They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological means, such as in Europe, North America and Australasia. The calculations focus on outcomes rather than on detailed discussion of the methods used. The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west. The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future. The emphasis is on workable, practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity.

Building Futures Jane Powell, Jennifer Monahan, Chris Foulds, 2015-11-24. A reduction in the energy demand of buildings can make a major contribution to achieving national and international carbon reduction goals in addition to addressing the interlinked issues of sustainable development, fuel poverty and fuel security. Despite improvements in thermal efficiency, the energy demand of buildings stubbornly remains unchanged or is only declining slowly due to the challenges posed by growing populations, the expectations of larger, more comfortable and better equipped living spaces and an expanding commercial sector. *Building Futures* offers an interdisciplinary approach to explore this lack of progress, combining technical and social insights into the challenges of designing, constructing and operating new low energy buildings as well as improving the existing inefficient building stock. The twin roles of energy efficiency, which is predominantly concerned with technological solutions and energy conservation, which involves changing people's behaviour, are both explored. The book includes a broad geographical range and scale of case studies from the UK, Europe and further afield, including Passivhaus in Germany and the UK Dongtan Eco City in China and retrofit houses in Denmark. This book is a valuable resource for students and academics of environmental science and energy based subjects as well as construction and building management professionals.

Mathematical Geoenergy Paul Pukite, Dennis Coyne, Daniel Challou, 2018-11-28. A rigorous mathematical problem solving framework for analyzing the Earth's energy resources. GeoEnergy encompasses the range of energy technologies and sources that interact with the geological subsurface. Fossil fuel availability studies have historically lacked concise modeling, tending instead toward heuristics and overly complex processes. *Mathematical GeoEnergy: Oil Discovery, Depletion and Renewal* details leading edge research based on a mathematically oriented approach to geoenergy analysis. Volume highlights include: Applies a formal mathematical framework to oil discovery, depletion and analysis; Employs first order applied physics modeling, decreasing computational resource requirements; Illustrates model interpolation and extrapolation to fill out missing or indeterminate data; Covers both stochastic and deterministic mathematical processes for historical analysis and prediction; Emphasizes the importance of up

to date data accessed through the companion website Demonstrates the advantages of mathematical modeling over conventional heuristic and empirical approaches Accurately analyzes the past and predicts the future of geoenergy depletion and renewal using models derived from observed production data Intuitive mathematical models and readily available algorithms make Mathematical GeoEnergy Oil Discovery Depletion and Renewal an insightful and invaluable resource for scientists and engineers using robust statistical and analytical tools applicable to oil discovery reservoir sizing dispersion production models reserve growth and more *Routledge International Handbook of Sustainable Development* Michael Redclift,Delyse Springett,2015-03-02 This Handbook gives a comprehensive international and cutting edge overview of Sustainable Development It integrates the key imperatives of sustainable development namely institutional environmental social and economic and calls for greater participation social cohesion justice and democracy as well as limited throughput of materials and energy The nature of sustainable development and the book s theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South Comprehensive in scope it covers amongst other areas Sustainable architecture and design Biodiversity Sustainable business Climate change Conservation Sustainable consumption De growth Disaster management Eco system services Education Environmental justice Food and sustainable development Governance Gender Health Indicators for sustainable development Indigenous perspectives Urban transport The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered *The Impact of Climate Change Mitigation on Indigenous and Forest Communities* Maureen F. Tehan, Lee C. Godden, Margaret A. Young, Kirsty A. Gover, 2017-10-26 The international legal framework for valuing the carbon stored in forests known as Reducing Emissions from Deforestation and Forest Degradation REDD will have a major impact on indigenous peoples and forest communities The REDD regime contains many assumptions about the identity tenure and rights of indigenous and local communities who inhabit use or claim rights to forested lands The authors bring together expert analysis of public international law climate change treaties property law human rights and indigenous customary land tenure to provide a systemic account of the laws governing forest carbon sequestration and their interaction Their work covers recent developments in climate change law including the Agreement from the Conference of the Parties in Paris that came into force in 2016 *The Impact of Climate Change Mitigation on Indigenous and Forest Communities* is a rich and much needed new contribution to contemporary understanding of this topic
