Physical Science Paper One 2013 Memorandum Alex Science:

A History of Scientific Journals Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03
Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history

Where Have All the Democrats Gone? Ruy Teixeira, John B. Judis, 2023-11-07 A Wall Street Journal Best Political Book of 2023 A much needed wake up call for the Democrats which reveals how the party has lost sight of its core principles and endangered its political future from the authors of one of the most influential political books of the 21st century The New York Times For decades American politics has been plagued by a breakdown between the Democratic and Republican parties in which victory has inevitably led to defeat and vice versa Both parties have lost sight of the people at the center of the American electorate leading to polarization and paralysis In *Where Have All the Democrats Gone* John B Judis and Ruy Teixeira reveal the tectonic changes shaping the country's current political landscape that both pundits and political scientists have missed The Democratic Party once the preserve of small towns as well as big cities and of the industrial working class and the newly immigrated has abandoned and even actively alienated many of these voters In this clarion call and essential argument for common sense and common ground Judis and Teixeira reveal the transformation of American politics and provide a razor sharp critique of where the Democrats have gone awry and how they can avoid political disaster in the days ahead

A Contagious Cause Robin Wolfe Scheffler, 2019-06-15 Is cancer a contagious disease In the late nineteenth century this idea and attending efforts to identify a cancer germ inspired fear and ignited controversy Yet speculation that cancer might be contagious also contained a kernel of hope that the strategies used against infectious diseases especially vaccination might be able to subdue this dread disease Today nearly one in six cancers are thought to have an infectious cause but the path to that understanding was twisting and turbulent *A Contagious Cause* is the first book to trace the century long hunt for a human cancer virus in

America an effort whose scale exceeded that of the Human Genome Project The government's campaign merged the worlds of molecular biology public health and military planning in the name of translating laboratory discoveries into useful medical therapies However its expansion into biomedical research sparked fierce conflict Many biologists dismissed the suggestion that research should be planned and the idea of curing cancer by a vaccine or any other means as unrealistic if not dangerous Although the American hunt was ultimately fruitless this effort nonetheless profoundly shaped our understanding of life at its most fundamental levels A Contagious Cause links laboratory and legislature as has rarely been done before creating a new chapter in the histories of science and American politics Death Dust William C. Potter, Sarah Bidgood, Samuel Meyer, Hanna Nottle, 2023-12-19 The postwar period saw increased interest in the idea of relatively easy to manufacture but devastatingly lethal radiological munitions whose use would not discriminate between civilian and military targets *Death Dust* explores the largely unknown history of the development of radiological weapons RW weapons designed to disperse radioactive material without a nuclear detonation through a series of comparative case studies across the United States the Soviet Union the United Kingdom Iraq and Egypt The authors illuminate the historical drivers of and impediments to radiological weapons innovation They also examine how new dire geopolitical events such as the war in Ukraine could encourage other states to pursue RW and analyze the impact of the spread of such weapons on nuclear deterrence and the nonproliferation regime *Death Dust* presents practical necessary steps to reduce the likelihood of a resurgence of interest in and pursuit of radiological weapons by state actors *Singularity Theory for Non-Twist KAM Tori* A. González-Enríquez, A. Haro, R. de la Llave, 2014-01-08 In this monograph the authors introduce a new method to study bifurcations of KAM tori with fixed Diophantine frequency in parameter dependent Hamiltonian systems It is based on Singularity Theory of critical points of a real valued function which the authors call the potential The potential is constructed in such a way that nondegenerate critical points of the potential correspond to twist invariant tori i.e. with nondegenerate torsion and degenerate critical points of the potential correspond to non twist invariant tori Hence bifurcating points correspond to non twist tori *Indigenous Governance of Traditional Knowledge* Neva Collings, 2023-08-17 This book addresses the issue of Indigenous peoples participation in genetic resource access and benefit sharing and associated traditional knowledge for self determination Genetic resources from nature are increasingly used in global biodiversity research and development but they often use Indigenous peoples traditional knowledge without their consent and without sharing the benefit The Nagoya Protocol is an instrument of the Convention on Biological Diversity intended to ensure Indigenous peoples traditional knowledge is used with their prior and informed consent or approval and entails benefit sharing on mutually agreed terms Many countries with significant Indigenous populations have signed the Nagoya Protocol and are currently grappling with implementation of its provisions This book takes up a case study of Australia to demonstrate how Indigenous community governance in settler states can serve as a path to implementing the Nagoya Protocol Australia's access and benefit sharing framework is globally

hailed as best practice offering lessons for other countries implementing the Nagoya Protocol Focusing on two Indigenous community organisations in Australia the book establishes a unique evaluative framework for analysing and differentiating the governance arrangements used by Indigenous communities for facilitating decision making related to traditional knowledge This book will appeal to scholars working in the areas of international environmental law human rights biotechnology law and Indigenous legal issues as well as those directly engaged in implementing access and benefit sharing measures and developing law reform strategies

Arming the Warship Iver P. Cooper, 2024-11-04 In the 16th century warships engaged at close range sometimes with yards touching and small arms fire and hand to hand combat were at least as important as the great guns As time went on the big guns became more decisive and increased in destructive power range and accuracy This book explores how naval armament armor ballistics and gunnery evolved from the 16th to 20th centuries from a scientific and technological perspective It examines the functional aspects the guns and their distribution on warships the propellants the projectiles and so forth and examines the development of each

An Economist's Guide to Economic History Matthias Blum, Christopher L. Colvin, 2018-12-08 Without economic history economics runs the risk of being too abstract or parochial of failing to notice precedents trends and cycles of overlooking the long run and thus misunderstanding how we got here Recent financial and economic crises illustrate spectacularly how the economics profession has not learnt from its past This important and unique book addresses this problem by demonstrating the power of historical thinking in economic research Concise chapters guide economics lecturers and their students through the field of economic history demonstrating the use of historical thinking in economic research and advising them on how they can actively engage with economic history in their teaching and learning Blum and Colvin bring together important voices in the field to show readers how they can use their existing economics training to explore different facets of economic history Each chapter introduces a question or topic historical context or research method and explores how they can be used in economics scholarship and pedagogy In a century characterised to date by economic uncertainty bubbles and crashes An Economist's Guide to Economic History is essential reading For further information visit <http://www.blumandcolvin.org>

Edith and Florence Stoney, Sisters in Radiology Adrian Thomas, Francis Duck, 2019-07-01 This book explores the lives and achievements of two Irish sisters Edith and Florence Stoney who pioneered the use of new electromedical technologies especially X rays but also ultraviolet radiation and diathermy In addition the narrative follows several intertwined themes as experienced by the sisters during their lifetimes Their upbringing influenced by their liberal minded scientist father set the tone for both their lives Irish independence fractured their family heritage Their professional

experiences fulfilling for Florence as a qualified doctor but often frustrating for Edith as a Cambridge educated scientist mirrored those of other aspiring women during this period when the suffragist movement expanded and women's lobby groups were formed World War I created an environment in which their unusual specialist knowledge was widely needed and the sisters war experiences are carefully examined in the book But ultimately this is the extraordinary story of two independent but closely bonded sisters and their abiding love and support for one another

International Arbitration in the Energy Sector Maxi Scherer, 2018-02-22 Disputes in the energy and natural resources sector are at the heart of international arbitration With more arbitrations arising in the international energy sector than in any other sector it is not surprising that the highest valued awards in the history of arbitration come from energy related arbitrations Energy disputes often involve complex and controversial issues relating to security sovereignty and public welfare *International Arbitration in the Energy Sector* puts international energy disputes into a global context providing broad coverage of different forms and systems of dispute resolution across both renewable and non renewable sectors With contributions from leading arbitrators academics and industry experts from across the globe the twenty chapters in the book enable readers to compare the approaches to and learnings from energy arbitrations across various legal systems and geographic regions After outlining the international energy arbitration legal framework in Part I the text delves into a detailed analysis of the problems which regularly arise in practice These include among other things commercial disputes in Part II e.g. over the upstream oil sector and long term gas supply contracts investor state disputes in Part III e.g. under the Energy Charter Treaty and public international law disputes in Part IV e.g. concerning international boundaries and the distribution of natural resources Alongside recent developments in the international energy sector attention is given to climate and sustainable development disputes which raise important questions about enforcing sustainability objectives on individuals corporations and states Backed by analyses of arbitral awards national court and international tribunal decisions treaties and other international legal instruments as well as current events and news in the energy industry this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field It is essential reading for any practitioner or researcher in the energy and natural resources sector

The Art of Classic Planning Nir Haim Buras, 2020-01-28 An accomplished architect and urbanist goes back to the roots of what makes cities attractive and livable demonstrating how we can restore function and beauty to our urban spaces for the long term Nearly everything we treasure in the world's most beautiful cities was built over a century ago Cities like Prague Paris and Lisbon draw millions of visitors from around the world because of their exquisite architecture walkable neighborhoods and human scale Yet a great deal of the knowledge and practice behind successful city planning has been abandoned over the last hundred years not because of traffic population growth or other practical hurdles but because of ill considered theories emerging from Modernism and reactions to it The errors of urban design over the last century are too great not to question The solutions being offered today sustainability walkability smart

and green technologies hint at what has been lost and what may be regained but they remain piecemeal and superficial In The Art of Classic Planning architect and planner Nir Haim Buras documents and extends the time tested and holistic practices that held sway before the reign of Modernism With hundreds of full color illustrations and photographs that will captivate architects planners administrators and developers The Art of Classic Planning restores and revitalizes the foundations of urban planning Inspired by venerable cities like Kyoto Vienna and Venice and by the great successes of L'Enfant's Washington Haussmann's Paris and Burnham's Chicago Buras combines theory and a host of examples to arrive at clear guidelines for best practices in classic planning for today's world The Art of Classic Planning celebrates the enduring principles of urban design and invites us to return to building beautiful cities Biogeomorphic Responses to Wildfire in Fluvial Ecosystems Joan L. Florsheim, Alison P. O'Dowd, Anne Chin, 2024-05-22 This volume draws together interdisciplinary studies that highlight key insights important to support heterogeneity biodiversity and resilience in fluvial ecosystems The syntheses point to greater emphasis on integrated approaches to advance strategies for ecosystem management toward conservation restoration and sustainable practices in particular to accommodate multiple possible postfire disturbance and recovery trajectories **The Disposition of Nature** Jennifer Wenzel, 2019-12-03 Finalist 2022 Ecocriticism Book Prize Association for the Study of Literature and the Environment Shortlisted 2020 Book Prize Association for the Study of the Arts of the Present How do literature and other cultural forms shape how we imagine the planet for better or worse In this rich original and long awaited book Jennifer Wenzel tackles the formal innovations rhetorical appeals and sociological imbrications of world literature that might help us confront unevenly distributed environmental crises including global warming The Disposition of Nature argues that assumptions about what nature is are at stake in conflicts over how it is inhabited or used Both environmental discourse and world literature scholarship tend to confuse parts and wholes Working with writing and film from Africa South Asia and beyond Wenzel takes a contrapuntal approach to sites and subjects dispersed across space and time Reading for the planet Wenzel shows means reading from near to there across experiential divides between specific sites at more than one scale Impressive in its disciplinary breadth Wenzel's book fuses insights from political ecology geography anthropology history and law while drawing on active debates between postcolonial theory and world literature as well as scholarship on the Anthropocene and the material turn In doing so the book shows the importance of the literary to environmental thought and practice elaborating how a supple understanding of cultural imagination and narrative logics can foster more robust accounts of global inequality and energize movements for justice and livable futures *Documentation et bibliothèques*, 2017 Prediction and Perception of Natural Hazards J. Nemec, J.M. Nigg, F. Siccardi, 2013-06-29 This collection of articles provides a unique overview of the state of the science in the prediction of and response to natural disaster events The uniqueness of this volume is that it comprises more than just the physical science perspective For each natural hazard included in this text social scientists have provided research summaries of how public

perceptions are related to the actions that are likely to be undertaken when people are confronted with information about the existence of a natural hazard threat In this book the reader can find a truly international characterization of both hazard perception and prediction The American and European contributors provide state of the science overviews of empirically based research knowledge that expands beyond any national boundaries This approach has resulted in broader understanding of what is currently known about predicting natural hazard events and predicting how those events or warnings of them will be responded to by different types of societies
