SPECIAL PINTO PERFORMANCE TRAINING PROGRAM

INTRODUCTION
The Pinto Performance Training Program is designed to provide the technician with the knowledge and skills necessary to properly diagnose and repair the Pinto Performance engine. This program is divided into two parts: a written test and a practical test. The written test covers the theory of operation and the practical test covers the actual repair procedures.

THEORY OF OPERATION
The Pinto Performance engine is a 1.6 liter, 4 cylinder, overhead valve engine. It is designed to provide maximum performance and economy. The engine is equipped with a carburetor, distributor, and timing belt. The carburetor is responsible for mixing the air and fuel, while the distributor is responsible for distributing the spark to the spark plugs. The timing belt is responsible for synchronizing the operation of the valves and the pistons.

DIAGNOSTIC PROCEDURES
The first step in diagnosing a Pinto Performance engine is to check the oil level. The oil level should be checked with the engine at operating temperature and on a level surface. The oil level should be at the top of the dipstick. If the oil level is low, it should be topped up with the recommended oil.

REPAIR PROCEDURES
The first step in repairing a Pinto Performance engine is to check the timing. The timing should be checked with the engine at operating temperature. The timing should be adjusted if it is out of specification. The next step is to check the carburetor. The carburetor should be cleaned and adjusted if necessary.
