of Angiogenesis and Immune Response in Tumor Microenvironment of Solid Tumor, volume II Xi Cheng, Ren Zhao, Xin Lu, 2023-12-13 This Research Topic is the second volume of the Community Series in the Role of Angiogenesis and Immune Response in Tumor Microenvironment of Solid Tumor Please Volume I here The microenvironment of tumors is consisted of the tumor stroma proliferating tumor cells infiltrating inflammatory cells blood vessels and various associated tissue cells The pre metastatic niche PRN is described as supportive and receptive which undergoes cellular and molecular changes to form the fertile soil or metastatic designated sites for metastatic tumor cell seed colonization Thus the PRN supports promoting tumor metastasis and tumor settlement in distant organs The infiltration of the immune cells and the

formation of blood vessels from the pre metastatic sites are critical for the tumor microenvironment Typically the angiogenic factor is strongly associated with the inflammatory response during the development of tumors Additionally the immunoediting processes are essentially devoted to promoting angiogenesis and modulating the innate and specific immune responses

What Matters for Health and Happiness Among the Older Adults in Asia Nai Peng Tey, Halimah Awang, Shekhar Chauhan, 2024-03-11 People want to live a healthy and happy later life A large body of literature shows the close association between health status and happiness and between health and active engagement in work exercise and social and religious activities However the causation between the two can run both ways and it is difficult to determine the causal effect with cross sectional data Various authors have shown the significant influence of socioeconomic factors and human needs on older people's health status and happiness A better understanding of the factors affecting healthy and happy aging is essential for policymaking to improve the well being of older people The availability of data from HRS family studies in several Asian countries CHARLS in China LASI in India JSTAR in Japan KLoSA in Korea IFLS in Indonesia HART in Thailand MARS in Malaysia and Longitudinal Study of Ageing and Health in Viet Nam see Gateway to Global Aging Data provides an excellent opportunity for researchers to examine factors affecting health and happiness among older adults within and across Asian countries This research topic aims to gather papers that investigate the socioeconomic attitudinal and behavioural factors affecting the health status and happiness life satisfaction of older adults in Asia The dependent variables may include physical health mental health disability ADL IADL cognitive functioning self rated health health expenditure feeling of happiness and life satisfaction The independent variables may be age gender marital status place of residence educational level active engagement work exercise social and religious activities family and social relationship and support outlook in life smoking drinking and access to and utilization of healthcare services etc Manuscripts can be based on individual countries or cross country analysis preferably using the panel data to establish the causal effects of the independent variables on the dependent variables

Exploring Mental Health in Vulnerable Populations in Developing Countries John Elvis Hagan Jr., Frank Quansah, Jacob Owusu Sarfo, Zahir Vally, Azaz Sharif, 2025-09-16 The physical social and economic implications of poor mental health are extensive The prevalence and pattern of mental health related challenges resources and interventions have been well reported in developed countries Despite the growing evidence of this health problem in developing countries a research gap still exists on the holistic measurement and description of the problem including interventions policies actions and programs to mitigate mental health challenges Considerable empirical evidence suggests that multifaceted social economic and environmental factors are drivers of mental health and its associated disorders Considering these points promoting mental health across vulnerable populations in low and middle income countries is critical to global health As the world seeks to achieve Sustainable Development Goal 3 SDG3 it is clear that mental health can significantly impact overall human health regardless of gender age or career stage the importance of improving the

mental health of vulnerable populations throughout an individual's lifespan and within different professional environments cannot be underestimated. By comprehending the obstacles and prospects related to mental health and its related illnesses among vulnerable populations, valuable insights could be obtained to create effective interventions and strategies that promote mental well-being globally. Specifically, taking steps to enhance the daily living conditions of this population offers opportunities to improve any population's mental health and decrease the risk of mental illnesses or disorders.
