Linking Families, Learning, and Schooling

Bobbie Kabuto, Prisca Martens, 2014-01-21 Parents who are also educational researchers have access to a domain that is highly complex and not always available to other scholars In this book parent researchers provide theoretical and practical insights into children's learning in the home and at school Readers are given a window into learning in the home context and how all family members organize or engage in that learning Working on two levels the book develops scholarly discussions about learning in the home how is it organized who the participants are and what children are learning and it illustrates the impacts that outside institutions in particular schools have on families It is unique in showcasing parent research as a type of research paradigm with particular aspects and challenges Both teachers and researchers can learn from these studies as they show the impact that schooling has on families and how institutional discourses and beliefs can both positively and negatively affect the dynamics of any family     *Public School Methods* ,1921     *Educational Tests and Measurements*

Conference Research Topic: 9th Symposium on Antimicrobial Resistance in Animals and the Environment (ARAE 2023) Benoit Doublet, Michel Stanislas Zygmunt, Axel Cloeckeaert, Sebastien Olivier Leclercq, 2025-02-03

The emergence of antimicrobial resistance is a seminally important public health concern Significant progress has been made in recent years regarding an understanding of the genetic and biochemical basis for antimicrobial resistance the emergence of resistance genes and factors promoting their widespread dissemination including the role of lateral gene transfer Nevertheless there is a dearth of information regarding the key hotspots and genetic mechanisms responsible for

resistance development and the exposure routes leading to the failure of antimicrobial agents important in human and animal medicine There is thus an urgent need for research to provide governments public health stakeholders and the agricultural sector the knowledge required to develop policies and practices that effectively mitigate resistance development This within a growing recognition that humans animals and the environment must be considered as intimately linked together if any resistance management strategy is to be successful *Commercial Tests and how to Use Them* Sherwin Cody,1919
