### Realidades 3 Capitulo 3:

La resolución de litigios en entornos digitalizados y mediante algoritmos: umbrales y horizontes , La solución de disputas es abordada en la presente obra por un lado desde la perspectiva del sistema jurisdiccional y por otro desde la práctica de los medios alternativos ahora denominados adecuados. Dicho tratamiento conjunto se centra en la repercusión tecnológica que supone la revolución digital y la utilización de algoritmos. Se tiene en cuenta que los cambios legislativos operados precisamente en dichos ámbitos han supuesto modificaciones relevantes: la Ley Orgánica 1/2025 sobre eficiencia del Servicio Público de Justicia, el Real Decreto Ley 6/2023 que afecta al servicio público de justicia, el Reglamento UE 2024/1689 por el que se establecen normas armonizadas en materia de inteligencia artificial, el Reglamento UE 2020/1783 relativo a la cooperación entre los órganos jurisdiccionales de los Estados miembros en el ámbito de la obtención de pruebas en materia civil o mercantil, obtención de pruebas y el Reglamento UE 2024/3228 referente a la plataforma europea de resolución de litigios. A partir de tales novedades aquí se profundiza en asuntos tales como la algoritmización, la inteligencia artificial en la actividad judicial y en el arbitraje, la responsabilidad por su uso, los MAS digitales y la incidencia en la vulnerabilidad, la deriva de la plataforma europea ODR, la aplicación de los ODR de consumo y su eficacia procesal y en el ámbito jurisdiccional las cuestiones controvertidas afectantes a las pruebas electrónicas, la práctica de prueba a través de videoconferencia en la cooperación judicial civil europea y la cogobernanza de la administración electrónica. En definitiva se extrae que la tecnificación de la Justicia puede aportar eficiencia pero debe hacerse de manera respetuosa con las garantías adquiridas y consolidadas en nuestro ordenamiento y al tiempo ha de resultar amable asertiva ante los desequilibrios de fuerza y ante las vulnerabilidades y ser capaz de aportar soluciones personalizadas ante distintas casuísticas. Por tanto la digitalización ha de estar al servicio de ser humano como también son humanos y de gran altura científica quienes afortunadamente configuran esta obra.

El fin del futuro Julio Rojas, 2025-04-01. El creador de Caso 63 y una de las voces más autorizadas de la ciencia ficción nos demuestra que la revolución tecnológica va más allá de lo que imaginamos. A través del recuento de los grandes avances de la ciencia, el libro nos presenta cuatro grandes expansiones que están transformando la humanidad: La expansión del cuerpo, La expansión de la mente, La expansión de la conciencia y la expansión de la realidad. El texto nos habla de robots avanzados y vehículos autónomos, de edición genética, clonación digital, así como de protocolos de inmortalidad. Sabremos más de cómo la IA evoluciona hacia la superinteligencia y qué es el transhumanismo. Nos adentraremos en las relaciones en metaversos y otras increíbles situaciones del mundo digital. A pesar de su naturaleza especulativa, EL FIN DEL FUTURO está basado en avances científicos y tecnológicos reales y nos presenta el futuro de una manera accesible y emocionante como una novela de ciencia ficción que no es ficción en absoluto.
