The First Portuguese Republic Miriam Pereira, 2019-02-20 The first Portuguese Republic stood between 1910 and 1926 A

characteristic of the Republican period was the strong civil participation particularly by the urban population Freedom of press and of association became constitutional rights and incentivized a powerful and very diversified associative movement in which trade unions and friendly societies stood out in the political spectrum as they promoted popular education and culture The time span studied is characterized by Portugals colonial expansion in Africa an important factor in Portugals involvement in the Great War As changes in education in the concept and structure of family and in the status of women linked with the new politics so emerged a different relationship between State and Church new avenues for the development of economic activity an increased focus on better labour conditions and emigration to Brazil Miriam Halpern Pereira provides a clear overview of the Republics many achievements and the internal political and wider international limitations resulting in its downfall The political social and cultural causes of the military overthrow of the first Portuguese Republic are analyzed against the backdrop of the concomitant rise of fascist regimes in other European countries in the years preceding the 1929 Depression The work provides a much needed updated synthesis of the myriad circumstances of the period and is intended for both the general public and students of modern Europe In a clear and concise style *Between Liberalism and Democracy* sheds new light on a controversial epoch of Portuguese history The Portuguese at War Nuno Severiano

Teixeira,2019-05-28 From war campaigns to peacekeeping operations *The Portuguese at War* presents an overview of the conflicts wars and revolutions in which Portugal was involved from the nineteenth century to the present day From the French invasions to the civil wars from the African Empire to the wars of decolonisation from belligerence in the First World War to neutrality in the Second from participation in the Atlantic Alliance to peacekeeping operations in Kosovo East Timor Lebanon and Afghanistan The book addresses the military interventions in politics and the role of the countrys political regimes in military reform from the Liberal Revolutions to the Republic from the military dictatorship and authoritarian regime to the 25th of April Revolution and the transition to democracy The historical record of Portugals war involvement is not only closely aligned to international and European circumstance but to internal factors the economy society public opinion and political military power A historical perspective must of necessity link Portuguese war excursions with the military institutions in place at the time their recruitment system social composition and organisation of the army navy and air force the military ethos the evolution of equipment weapons and military technologies strategic military doctrine and how this impacted on tactics and military operations and of course the war outcomes Special attention is given to the effects of international isolation after the Estado Novo and post Cold War europeanisation The book does not eschew the plurality of interpretative theories Rather it seeks to combine historical accuracy of the Portuguese at war within a highly readable literary narrative aimed not only at undergraduate and research levels but at a broader public audience interested in the complex reach and role of Portugal in world history Principios generales de derecho privado Luis Mariano

Silvia Grassi, 2016-09-23 Taking as a starting point an interpretation of the television medium as an Ideological State Apparatus this book examines how gender roles and non heteronormative sexualities are constructed in Spanish and Catalan television series In the first part which focuses on the construction of gender roles in Catalan soap operas it applies the analytical paradigms founded by Anglo Saxon feminist scholars for the content of soap operas to a corpus of material which has rarely been analysed through this perspective In the second part which focuses on the construction of non heteronormative sexualities in Spanish and Catalan television series the book challenges the rhetoric of normalisation and the essentialist paradigms which have so far dominated the examination of the construction of sexuality in television series As such this book addresses the role performed by television in the construction of meanings which surround gender issues and non heteronormative sexualities This is a timely exercise because gender studies and studies of sexual dissidence are fairly recent fields in Spanish and Catalan academia and television has been largely disregarded especially as far as the analysis of characters and storylines is concerned As a result this book represents a major contribution to these fields in the Spanish and Catalan contexts **Mario Vargas Llosa** Roy Charles Boland, 1988 *Periodismo especializado tomo II*

Latin American Dictatorships in the Era of Fascism António Costa Pinto, 2019-06-14 Latin American Dictatorships in the Era of Fascism focuses on the reverse wave of dictatorships that emerged in Latin America during the 1930s and the transnational dissemination of authoritarian institutions in the era of fascism António Costa Pinto revisits the study of authoritarian alternatives to liberal democracy in 1930s Latin America from the perspective of the diffusion of corporatism in the world of inter war dictatorships The book explores what drove the horizontal spread of corporatism in Latin America the processes and direction of transnational diffusion and how social and political corporatism became a central set of new institutions utilized by dictatorships during this era These issues are studied through a transnational and comparative research design to reveal the extent of Latin America's participation during the corporatist wave which by 1942 had significantly reduced the number of democratic regimes in the world This book is essential reading for students studying Latin American history 1930s dictatorships and authoritarianism and the spread of corporatism *Power to the People* Jonathan Benjamin-Alvarado, 2002-05-03 First published in 2000 Why would Cuba an isolated and impoverished country be trying to develop a nuclear energy capability and why would it attempt to expand its energy generation capability when it can barely feed its population This book seeks to clarify the risks and opportunities associated with the development and expansion of the Cuban energy sector Once reliant on imported fossil fuels as well as Russia's willingness to underwrite its energy development schemes post Cold War Cuba is now confronted with the daunting tasks of expanding its energy capabilities while simultaneously replacing its energy infrastructure Drawing on extensive fieldwork in Cuba this book looks in depth at the economic social and political implications of what is rapidly becoming one of the next century's most important public policy issues in Cuba From Community to Consumption Alessandro Bonanno, Hans Baker, Raymond Jussaume, Yoshio Kawamura, Mark Shuksmith, 2010-09-08 Contains papers presented at the XII World Congress of Rural Sociology held in South Korea in 2008 This book provides an international view of the advanced production in rural sociology

From Franco to Freedom Miguel Angel Ruiz Carnicer, 2018-11-01 This book brings together recent research by a group of specialists in history and sociology to provide a new reading of the late Franco dictatorship especially in relation to its political culture The authors focus on the election of local trade union and national representatives the work of the first Spanish sociologists the struggle over administrative reform the role of the media and the intellectuals as well as the evolution of the dictatorships political class and its response to the regimes decline Not only are the politics of the late dictatorship scrutinised but also the mechanisms that were deployed to control the fast changing society of the 1960s and 1970s In examining the late Franco period the contributors do not believe that it contained the seeds of Spain's later democratisation but maintain that certain sectorial regime initiatives electoral and political changes an evolving discourse and an interest in political processes outside Spain made many Spaniards aware of the dictatorships contradictions and

limitations thereby encouraging its subsequent political and social evolution This transformation is compared with the latter stages of the parallel dictatorship in Portugal The great majority of Spaniards felt that the embrace of democratic freedoms and integration into the European Community was the only way forward during the Transition But the shift from dictatorship to democracy from the 1960s onwards in Spain needs to be understood in relation to the multitude of political and social changes that took place despite the opposition of Franco and the bunker mentality of the regime These changes manifested in a complex interaction between internal and external factors which eventually resulted in the transformation of Spanish society itself **Negation in Baroja** Leo L.
