More recent is the rise of a vibrant research community focusing on gaming and entertainment applications. In a relentless drive for innovation, it looks to create and understand an ever increasing range of experiences and examine how games can provide value for educational, therapeutic and other serious purposes. These themes were reflected in the call for participation and eventually the papers accepted for presentation. The Fun n Games conference was the second event of a bi-annual series of conferences. The first event of the series was held in Preston in 2006, organized by the University of Central Lancashire. Following the success of this event, it was decided to run a follow up.

In doing so, it draws from the experience of Western and Eastern and South-eastern Europe. These European cases are complemented with evidence from Kenya, Thailand as well as US, China, India and Mexico. The book explores multiple causes of decentralization, arguing beyond the pursuit of cheap and adaptable labour. It concludes by putting forward recommendations for best future practice of successful adjustment strategies and examines how these might be adopted elsewhere in the world.      **The Korean Electronics Industry** Michael Pecht, 2020-07-24.
