QUESTION

1. A 65-year-old male with a long history of hypertension and hyperlipidemia presents to the emergency department with acute onset of severe chest pain, described as a crushing pressure, lasting for 30 minutes. He has no known allergies and is currently on lisinopril and atorvastatin. His vital signs are: BP 180/100 mmHg, HR 110 bpm, RR 20 breaths/min, SpO2 92% on room air. Physical examination reveals clear lungs, normal heart sounds, and no lower extremity edema. ECG shows ST-segment depression in leads II, III, and aVF, and ST-segment elevation in leads V1, V2, and V3. Arterial blood gas (ABG) shows pH 7.35, PaCO2 40 mmHg, PaO2 85 mmHg, and HCO3- 24 mmol/L. Serum troponin I is elevated at 0.15 ng/mL.

What is the most appropriate next step in management?

A. Administer aspirin 325 mg orally.

B. Administer morphine 4 mg intravenously.

C. Administer sublingual nitroglycerin 0.4 mg.

D. Administer intravenous tPA.

E. Administer intravenous beta-blocker.

ANSWER

The correct answer is C. Administer sublingual nitroglycerin 0.4 mg.

This patient is presenting with symptoms and signs consistent with an acute coronary syndrome (ACS), specifically a non-ST-elevation myocardial infarction (NSTEMI). The key findings include severe chest pain, ST-segment depression in leads II, III, and aVF, and ST-segment elevation in leads V1, V2, and V3. The elevated troponin I further supports the diagnosis of NSTEMI.

The management of NSTEMI follows the ABCs (Airway, Breathing, Circulation) and includes the following steps:

- Aspirin:** Administer 325 mg orally as soon as possible.
- Nitroglycerin:** Administer sublingual nitroglycerin 0.4 mg, repeating every 5 minutes up to three doses if needed and if the patient's systolic blood pressure remains above 90 mmHg.
- Morphine:** Administer 4 mg intravenously for pain relief if needed.
- Beta-blocker:** Administer intravenous beta-blocker if the patient is not hypotensive and has no contraindications.
- Thrombolysis:** Intravenous tPA is not indicated for NSTEMI.

Therefore, the most appropriate next step in management is to administer sublingual nitroglycerin 0.4 mg.

Aizcorbe,2014-06-12 This book provides an accessible guide to price index and hedonic techniques with a focus on how to best apply these techniques and interpret the resulting measures One goal of this book is to provide first hand experience at constructing these measures

with guidance on practical issues such as what the ideal data would look like and how best to construct these measures when the data are less than ideal. A related objective is to fill the wide gulf between the necessarily simplistic elementary treatments in textbooks and the very complex discussions found in the theoretical and empirical measurement literature. Here the theoretical results are summarized in an intuitive way and their numerical importance is illustrated using data and results from existing studies. Finally, while the aim of much of the existing literature is to better understand official price indexes like the Consumer Price Index, the emphasis here is more practical: to provide the needed tools for individuals to apply these techniques on their own. As new datasets become increasingly accessible, tools like these will be needed to obtain summary price measures. Indeed, these techniques have been applied for years in antitrust cases that involve pricing where economic experts typically have access to large granular datasets.

The EBay Price Guide Julia L. Wilkinson, 2006. Provides lists of selling prices of items found on eBay in such categories as antiques, boats, books, cameras, coins, collectibles, dolls, DVDs, real estate, stamps, tickets, and video games.
