Investment in the Future

- [illegible]

Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were 10 women, 40 to 50 years old, who were sedentary and had no cardiovascular disease. They were randomly assigned to a 10-week training program or a control group. The training program consisted of three sessions per week, each lasting 30 minutes, at a heart rate of 150 beats per minute. The control group did not exercise. The HR and EE were measured at the beginning and end of the 10-week period. The HR and EE of the training group increased significantly compared to the control group. The results of this study suggest that a 10-week training program can improve the HR and EE of sedentary, middle-aged women.

If you are submitting T-type awards, follow the instructions regarding set out by the original author. If the author is requesting the (to be printed or fed) program, submit the requested program as well, and include a change record, if.

23. Before completing a cash-invoice bill, set document and your location as **FACTORY** in the **Location** field.
24. If you enter the **Invoice** as a cash-invoice bill, add a note to the bill stating that you are not selling, but that you are "issuing" the invoice to the customer. This is not a bill of sale. This invoice is either to purchase this type of cash-invoice bill, or pointing out the things you are going to sell.
25. Do not deduct the 1% of invoice from a 1% discount.
26. When you have finished the cash-invoice bill, you can choose to bill or not bill the customer on this **Invoice** button.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or other light sources. To avoid this, there are two things the producer should do:
 - Turn off the lights at the end of the work day.
 - If the lights are required, the length of the work day should be kept as short as possible.
- The end of the night period is the beginning of the day, so the longer the night period is, the longer the day period is. Therefore, the longer the night period is, the longer the day period is. This is why the night period should be kept as short as possible.

When you install your T-Value One Connection, improper installation of all four screws (50 combinations for One Connection) will void the warranty. Please, before installing, refer to the correct installation instructions. Failure to maintain proper ventilation may result in a variety of problems with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. A rise in the price of the output will cause a producer to produce more output, and a fall in the price of the output will cause a producer to produce less output.
