Practical Guide to the NEC3 Professional Services Contract Michael Rowlinson, 2012-05-08 Currently in its third edition the NEC suite has become one of the UK s leading families of standard forms of contract for major construction and civil engineering projects Part of the

NEC suite the Professional Services Contract PSC was drafted with the same process based approach and objectives offering a standard contract for the appointment of consultants providing professional services in an engineering or construction project. Embodying best practice in terms of project management, the basic philosophy of the PSC differs from the principles and approach of other standard contracts used to appoint consultants. This book is a practical guide to the application of the PSC. Starting with a brief discussion of the background and philosophy behind the PSC, it identifies the roles and responsibilities of each of the named functions within the contract, explains the approaches required to achieve a successful working relationship between all parties and examines all the procedures in the PSC. The book explains the links between the various sections of the contract to assist the reader with cross referencing and covers all the variations created by the Main and Secondary Options. As a very practical guide, it will aid users in the transition from their use and understanding of the other standard contracts to the collaborative project management based approach of the PSC. Written for anyone working in the construction and related industries using the PSC to procure or provide consultancy services in relation to a construction project, it will be of interest to the complete construction supply chain, particularly architects, structural engineers, services M&E engineers, civil engineers, quantity surveyors and interior designers, together with Contractors and Sub Contractors who have a design liability and employ consultants to assist them. It will also be of interest to consultants and lawyers advising any of these parties either in the preparation of contract documentation or the resolution of problem situations which may arise.

Understanding the NEC4 Professional Service Contract Kelvin Hughes, 2020-11-25. As usage of the NEC formerly the New Engineering Contract family of contracts continues to grow worldwide, so does the importance of understanding its clauses and nuances to everyone working in the built environment. Currently in its fourth edition, NEC4, this set of contracts is different to others in concept as well as format, so users may well find themselves needing a helping hand along the way. Understanding the NEC4 Professional Service Contract uses plain English to lead the reader through the NEC4 Professional Service Contract's key features and differences from its predecessor, the NEC3 Professional Services Contract, including Main and Secondary Options, the use of early warnings, programme provisions, payment, compensation events, preparing tender documents. Common problems experienced when using the Professional Service Contract are signalled to the reader throughout, and the correct way of interpreting each clause explained. The way the contract affects procurement processes, dispute resolution, project management and risk management are all addressed in order to direct the user to best practice. Written for construction professionals by a practising international construction contract consultant, this handbook is the most straightforward, balanced and practical guide to the NEC4 Professional Service Contract available. It is an ideal companion for Clients, Contractors, Service Managers, Project Managers, Supervisors, Engineers, Architects, Quantity Surveyors, Subcontractors and anyone else interested in working successfully with the NEC4 Professional Service Contract.
