Autonomic Nerve Function in the Vertebrates S. Nilsson, 2012-12-06 The intention of this book is to offer a comprehensive description and discussion of autonomic nerve function in the vertebrates from several points of view Sections on anatomy biochemistry of the transmitter substances and the structure physiology and pharmacology of the different types of autonomic neurons have been included together with chapters dealing with the autonomic nervous control of some organs and organ systems in the different vertebrate groups Although knowledge in several of these areas is based primarily on studies of mammals a certain emphasis has been placed on the autonomic nerve functions in the non mammalian vertebrates to describe from a comparative physiological point of view the adaptations and possible phylogenetic trends in the development of the autonomic nerve functions in the vertebrates It is very obvious that the literature created by the vigorous research activities within the fields of autonomic nervous anatomy histochemistry biochemistry pharmacology and
