But few routers will deliver the richness of high-speed Wi-Fi strength. Even though Wi-Fi has become ubiquitous in years, it still takes time and effort to get the most out of your system. What you really need is a high-speed Wi-Fi mesh. These mesh centralized routers don't just deliver Wi-Fi to your areas. Such a setup will enable you to enjoy Wi-Fi from any part of your home. Even better, the whole home mesh will let multiple devices work without slowing things down. With all this in mind, how does the Netgear Nighthawk Mk62 High-Speed Wi-Fi Mesh achieve this goal? To deliver Wi-Fi to devices, routers need a router. The router which is the largest of the two blocky units offered with the kit isn't the internet first. That mesh router isn't the Wi-Fi to one or more devices. That's why the second blocky unit in the kit is a wonderful little bit of magic. Unlike mesh Wi-Fi satellites, it never gives up about the mesh size. The router is ready to explore new features and know your device better.
