

Netview

Purpose of this tool

Netview can be used for online monitoring of SIPROTEC devices (at least module-firmware 4.00 needed for Ethernet module, which was released in 06/2007). Also other devices like switches or PCs can be monitored (automatically by the "ping"-command), if they are imported in the SCD – file with their ICD – file description. Comprehensive monitoring values are only available for SIPROTEC – devices.

Netview requires the exported SCD-file of a DIGSI-project. The SCD-file contains the IP-addresses of all participating devices, if they are imported into the System Configurator of DIGSI. The Ethernet modules in the SIPROTEC devices support the SNMP-protocol, which provides the EN100 module information to Netview. Netview shows all necessary communication parameters with Web – pages, which are created and updated automatically when the tool is in operation. So you have an online view to your network. Netview supports you during build up your station bus and troubleshooting in case of communication failures as well.
