Primary Physical Science Education Hans U. Fuchs, Federico Corni, 2023-10-10 This open access book is the first of two volumes that integrates a study of direct encounters with Primary Forces of Nature Wind Light Rain Heat and Cold Water etc with imaginative narrative forms of communication The approach developed in this book shows how the growth of cognitive tools first of mythic and then of romantic forms of understanding lets children make sense of experiencing physical phenomena An in depth description of Fluids Gravity and Heat as Basic Forces shows how primary sense making can evolve into understanding of aspects of physical science allowing for a nature based pedagogy and application to environmental systems The final chapter introduces visual metaphors and theatrical storytelling that are particularly useful for

understanding the role of energy in physical processes It explores how a mythic approach to nature can inform early science pedagogy This book is of interest to kindergarten and primary school teachers as well as early education researchers and instructors
