Federal Register ,2012-06 *How We Teach Science* John L. Rudolph,2019-06-01 Despite an enduring belief that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public *Chemical News and Journal of Physical Science* ,1909 **The Chemical News and Journal of Physical Science** ,1904 Scientists in the Classroom J. Rudolph,2002-05-02 During the 1950s leading American scientists embarked on an unprecedented project to remake high school science education Dissatisfaction with the soft school curriculum of the time advocated by the professional education establishment and concern over the growing technological sophistication of the Soviet Union led government officials to encourage a handful of elite research scientists fresh from their World War II successes to revitalize the nations science curricula In *Scientists in the Classroom* John L Rudolph argues that the Cold War environment long neglected in the history of education literature is crucial to understanding both the reasons for the public acceptance of scientific authority in the field of education and the nature of the curriculum materials that were eventually produced Drawing on a wealth of previously untapped resources from government and university archives Rudolph focuses on the National Science Foundation supported curriculum projects initiated in 1956 What the historical record reveals according to Rudolph is that these materials were designed not just to improve American science education but to advance the professional interest of the American scientific community in the postwar period as well **Dignity, Discourse, and Destiny** Darwin H. Stapleton,Donna Stapleton,2004 *Childhood Harvard Oxford and marriage In the Navy Return to education Princeton The Woodrow Wilson Program years Swarthmore College at mid century Swarthmore looks for Courtney Inauguration The case for the liberal arts college Faculty There is strength in having a variety of sources of support funding the liberal arts tradition Networks of support and service behind the presidency Nature shaped to advantage preserving campus viability Student activism to care about social justice Two decades of student life at Swarthmore Personal things Administration of a college The final year Conclusion* **Stratospheric Ozone and Man** Frank A. Bower,2018-01-10 The book as originally conceived was to be limited to technical considerations but the scientific course of event has been so interwoven with non scientific but nevertheless related events the authors felt necessary to include an account of this situation Accordingly the book is divided into five sections entitled Stratospheric ozone Atmospheric processes influencing stratospheric ozone Does man influence stratospheric ozone Effects and research Public policy **Science, History and Social Activism** Garland E. Allen,Roy M. MacLeod,2013-03-14 To earn a degree every doctoral candidate should go out to Harvard Square find an audience and explain his or her dissertation Everett Mendelsohn s worldly advice to successive generations of students whether apocryphal or real has for over forty years spoken both to the essence of his scholarship and to the role of the scholar Possibly no one

has done more to establish the history of the life sciences as a recognized university discipline in the United States and to inspire a critical concern for the ways in which science and technology operate as central features of Western society This book is both an act of homage and of commemoration to Professor Mendelsohn on his 70th birthday As befits its subject the work it presents is original comparative wide ranging and new Since 1960 Everett Mendelsohn has been identified with Harvard University and with its Department of the History of Science Those that know him as a teacher will also know him as a scholar In 1968 he began and after 30 years has just bequeathed to others the editorship of the Journal of the History of Biology among the earliest and one of the most important publications in its field At the same time he has been a pioneer in the social history and sociology of science He has formed particularly close working relationships with colleagues in Sweden and Germany as witnessed by his editorial presence in the Sociology of Science Yearbook

The Pontecorvo Affair
 Simone Turchetti, 2012-01-27 In the fall of 1950 newspapers around the world reported that the Italian born nuclear physicist Bruno Pontecorvo and his family had mysteriously disappeared while returning to Britain from a holiday trip Because Pontecorvo was known to be an expert working for the UK Atomic Energy Research Establishment this raised immediate concern for the safety of atomic secrets especially when it became known in the following months that he had defected to the Soviet Union Was Pontecorvo a spy Did he know and pass sensitive information about the bomb to Soviet experts At the time nuclear scientists security personnel Western government officials and journalists assessed the case but their efforts were inconclusive and speculations quickly turned to silence In the years since some have downplayed Pontecorvo's knowledge of atomic weaponry while others have claimed him as part of a spy ring that infiltrated the Manhattan Project The Pontecorvo Affair draws from newly disclosed sources to challenge previous attempts to solve the case offering a balanced and well documented account of Pontecorvo his activities and his possible motivations for defecting Along the way Simone Turchetti reconsiders the place of nuclear physics and nuclear physicists in the twentieth century and reveals that as the discipline's promise of military and industrial uses came to the fore so did the enforcement of new secrecy provisions on the few experts in the world specializing in its application
