Ideas and Politics in Social Science Research Daniel Beland, Robert Henry Cox, 2010-12-10 Writing about ideas John Maynard Keynes noted that they are more powerful than is commonly understood Indeed the world is ruled by little else One would expect therefore that political science a discipline that focuses specifically on the nature of power would have a healthy respect for the role of ideas However for a variety of reasons not least of which is the influence of rational choice theory which presumes that individuals are self maximizing rational actors this is not the case and the literature on the topic is fairly thin As the stellar cast of contributors to this volume show ideas are in fact powerful shapers of political and social life In *Ideas and Politics in Social Science Research* Daniel B land and Robert Henry Cox have gathered leading scholars from a variety of subdisciplines in political science and sociology to provide a general overview of the theoretical empirical and methodological issues raised by social science research on ideas and politics Throughout they hone in on three central questions What is the theoretical basis for studying ideas in politics What are the best methods What sort of empirical puzzles can be solved by examining ideas and related phenomena such as discourse policy paradigms and framing processes In sum this is a state of the art academic work on both the role of ideas in politics and the analytical utility that derives from studying them

Thomson Nelson Guide to Research and Writing in Political Science Lucille Charlton, Mark Charlton, 2006 Writing is an integral skill to the practice and discipline of Political Science Developed specifically for the Canadian marketplace the Thomson Nelson Political Science Writer s Guide provides students with writing instruction specific to the discipline Full of practical information on how to write various types of political science assignments from a basic essay to op ed pieces significant attention is paid to writing position papers and briefing documents and creating documents for use within the Parliamentary process The Thomson Nelson Political Science Writer s Guide is a practical guide to the research and writing of any type of political science assignment and includes numerous examples upon which students can model their writing It also enables students to work through all steps of an assignment from research to writing organization and citations With this guide at the ready

instructors are able to vary their writing assignments without spending extensive in class time introducing students to different styles of political science writing. Instructors can also assign longer and more complex writing assignments as the students progress through their studies. The Thomson Nelson Political Science Writer's Guide serves the needs of all levels of Political Science students and is an excellent resource that can be referred to later in their careers in Political Science.

Scalable and Efficient Probabilistic Topic Model Inference for Textual Data Måns Magnusson, 2018-04-27 Probabilistic topic models have proven to be an extremely versatile class of mixed membership models for discovering the thematic structure of text collections. There are many possible applications covering a broad range of areas of study: technology, natural science, social science and the humanities. In this thesis, a new efficient parallel Markov Chain Monte Carlo inference algorithm is proposed for Bayesian inference in large topic models. The proposed methods scale well with the corpus size and can be used for other probabilistic topic models and other natural language processing applications. The proposed methods are fast, efficient, scalable and will converge to the true posterior distribution. In addition, in this thesis, a supervised topic model for high dimensional text classification is also proposed, with emphasis on interpretable document prediction using the horseshoe shrinkage prior in supervised topic models. Finally, we develop a model and inference algorithm that can model agenda and framing of political speeches over time with a priori defined topics. We apply the approach to analyze the evolution of immigration discourse in the Swedish parliament by combining theory from political science and communication science with a probabilistic topic model.

Probabilistiska mnesmodeller: topic models är en mngsidig klass av modeller för att estimeras mnessammansättningarna i stora corpusar. Applikationer finns i ett flertal vetenskapsområden som teknik, naturvetenskap, samhällsvetenskap och humaniora. I denna avhandling föreslås nya effektiva och parallella Markov Chain Monte Carlo algoritmer för Bayesianiska mnesmodeller. De föreslagna metoderna skalar väl med storleken på corpuset och kan användas för flera olika mnesmodeller och liknande modeller inom språkteknologi. De föreslagna metoderna är snabba, effektiva, skalbara och konvergerar till den sanna posteriorfördelningen. Dessutom föreslås en mnesmodell för högh dimensionell textklassificering med tonvikt på tolkningsbar dokumentklassificering genom att använda en kraftigt regulariserande priorifördelningar. Slutligen utvecklas en mnesmodell för att analysera agenda och framing för ett förutbestämt mne. Med denna metod analyserar vi invandringsdiskursen i Sveriges Riksdag över tid genom att kombinera teori från statsvetenskap, kommunikationsvetenskap och probabilistiska mnesmodeller.
