Bloomsbury, 2015-05-21 This practical pocket guide published in association with the Wildlife Trusts includes more than 190 species of animal and plant that inhabit still water bodies such as ponds, pools and small lakes in northern Europe. Each species account includes accurate artworks and concise descriptions outlining essential details such as size, habitat, ecology and distribution in Britain and the near Continent. A vast number of species occurs in these habitats so the guide selectively pictures and describes a good range of fauna and flora that are most likely to be found and identified. Among the fascinating animals featured are freshwater sponges, hydras, water bears, worms, leeches, water snails, dragonflies and damselflies, frogs and toads, bats, fish, birds and iconic mammals such as the Water Vole and European Otter. The easy to follow layouts and illustrations aid quick and precise identification, making the book an indispensable reference in the field as well as in the home and garden. [99 Jumpstarts for Kids' Science Research](#)

Science Centres and Science Events Anne-Marie Bruyas, Michaela Riccio, 2012-10-30 The idea for this text stemmed from the fruitful experience gathered during the training course of 9 Nigerian university students organized in Naples from 3 to 18 September 2008 by the team of Fondazione IDIS Citt della Scienza under the project Science Centre Owerri The training course turned out to be not only an educational

opportunity to acquire knowledge and skills for these students but also a real and practical tool that later led to the realization of the first Science Festival of Owerri in Nigeria in May 2009 This in turn sparked the idea of creating a highly practical handbook for those who want to face the challenge of developing new projects for the dissemination and socialization of science in developing countries In these countries the role of scientific education and training in schools is not sufficient to arouse scientific curiosity among young people and make the population aware of the importance of scientific knowledge in everyday life Moreover science and technology are indispensable tools for people's empowerment and should be supported with actions that encourage curiosity about science and the intelligent use of technology to bridge the divide with developed countries It is therefore necessary to set up activities that are carefully targeted to promote and communicate science The text has been designed as a practical guide to be used in a variety of contexts scientific events or more structured science festivals training the creation of scientific cultural associations and the development of new science centres Besides being an excellent tool for training and supporting the design and planning phases the manual can also be used as a reference work for institutions and local cultural services which have to select projects of this type
