Communication, Digital Media, and Popular Culture in Korea Dal Yong Jin, Nojin Kwak, 2018-05-16 In recent decades Korean communication and media have substantially grown to become some of the most significant segments of Korean society. Since the early 1990s, Korea has experienced several distinctive changes in its politics, economy, and technology, which are directly related to the development of local media and culture. Korea has greatly developed several cutting-edge technologies such as smartphones, video games, and mobile instant messengers to become the most networked society throughout the world. As the Korean Wave exemplifies, the once small and peripheral Korea has also created several unique local popular cultures, including television programs, movies, and popular music known as K-pop, and these products have penetrated many parts of the world. As Korean media and popular culture have rapidly grown, the number of media scholars and topics covering these areas in academic discourses has increased. These scholars' interests have expanded from traditional media such as Korean journalism and cinema to several new cutting-edge areas like digital technologies, health, communication, and LGBT-related issues. In celebrating the Korean American Communication Association's fortieth anniversary in 2018, this book documents and historicizes the growth of growing scholarship in the realm of Korean media and communication.

Machine Intelligence and Emerging Technologies Md. Shahriar Satu, Mohammad Ali Moni, M. Shamim Kaiser, Mohammad Shamsul Arefin, 2023-06-10 The two-volume set LNICST 490 and 491 constitutes the proceedings of the First International Conference on Machine Intelligence and Emerging Technologies MIET 2022 hosted by Noakhali Science and Technology University, Noakhali, Bangladesh, during September 23-25, 2022. The 104 papers presented in the proceedings were carefully reviewed and selected from 272 submissions. This book focuses on the theoretical/practical state-of-the-art applications and research challenges in the field of artificial intelligence and emerging technologies. It will be helpful for active researchers and practitioners in this field. These papers are organized in the following topical sections: imaging for disease detection, pattern recognition, and natural language processing; bio-signals and recommendation systems for wellbeing; network security and nanotechnology; and emerging technologies for society and industry.

The Oxford Handbook of Project Management Peter W. G. Morris, Jeffrey K. Pinto, Jonas Söderlund, 2012-07-19 The Oxford Handbook of Project Management presents and discusses leading ideas in the management of projects. Positioning project management as a domain much broader and more strategic than simply execution management, this Handbook draws on the insights of over 40 scholars to chart the development of the subject over the last 50 years or more as an area of increasing practical and academic interest. It suggests we could be entering an emerging third wave of analysis and interpretation following its early technical and operational beginnings and the subsequent shift to a focus on projects and their management. Topics dealt with include the historical evolution of the subject, its theoretical base, professionalism, business and societal context, strategy, organization, governance, innovation, overruns, risk, information management, procurement, relationships, and trust/knowledge.

management practice and teams This handbook is of particular relevance to those interested in the research issues underlying project management *Advances in Intelligent Manufacturing and Robotics* Andrew Tan, Fan Zhu, Haochuan Jiang, Kazi Mostafa, Eng Hwa Yap, Leo Chen, Lillian J. A. Olule, Hyun Myung, 2024-02-26 This book presents selected peer reviewed articles from the International Conference on Intelligent Manufacturing and Robotics ICIMR 2023 held on 22-23 August at the Xi'an Jiaotong Liverpool University in China The book deliberates on the key challenges engineering and scientific discoveries innovations and advances in intelligent manufacturing and robotics that are non-trivial through the lens of Industry 4.0 In this book traditional and modern solutions that are employed across the spectrum of various intelligent manufacturing and robotics contexts are discussed The book provides an insightful view on the current trends issues mitigating factors as well as proposed solutions
