

Read the selection. Then answer the questions that follow.

The Monkeys

In a forest of Ecuador on South America, a monkey hangs in the trees. It holds its legs, curved like a hook, over a lower branch, while its hands grip the side of the branch above it at a time. The long legs of the monkey hold it in place as it swings its weight. Its palms without opposable thumbs in the feet, giving the animal a prehensile tail. This helps the monkey hold onto its branches.

Many monkeys "hunker," it means slowly reposition its body as it sits. The monkey usually sits on the ground when it is alone. Since it can usually move and climb freely, it is not afraid. On the ground, the monkey moves with a walking motion. It is "hunker" in the trees most of the time, eating and sleeping.
