

32.2 Lutheranism

Read Section 32.2. In the corresponding part of the drawing, record at least two key ideas about each of the topics listed below.

- origins of the religion

Lutheranism was founded by Martin Luther in Germany in 1521.

- beliefs about sin and salvation

Lutherans believed that salvation was a gift from God. It was received by people if they sincerely believed in Jesus, were sorry for their sins, and accepted the Bible as truth. Luther called this "justification by faith."

- beliefs about the ultimate source of authority

Lutherans believed that the Bible was the only true source of religious guidance. They rejected the authority of church councils and the pope.

- rituals and worship

Lutherans kept some Catholic practices and added new Lutheran ones. The church looked much like a Catholic Church (with altars, crucifix, and candles). Lutheran services had some similarities to Catholic mass, such as Communion, Bible readings, sermons, and hymns. There were also differences, such as prayers in German instead of Latin and two sacraments instead of seven.

- community life

Luther emphasized strict discipline and large, strong families. Children were taught to pray before meals and bed.

Answers will vary.
Some possibilities are
listed for each topic.

Against the Law Paul F. Campos, Pierre Schlag, Steven Douglas Smith, 1996 A fundamental critique of American law and legal thought Against the Law consists of a series of essays written from three different perspectives that coalesce into a deep criticism of contemporary legal culture Paul F Campos Pierre Schlag and Steven D Smith challenge the conventional representations of the legal system that are articulated and defended by American legal scholars Unorthodox irreverent and provocative Against the Law demonstrates that for many in the legal community law has become a kind of substitute religion an essentially idolatrous practice composed of systematic self misrepresentation and self deception Linked by a persistent inquiry into the nature and identity of the law these essays are informed by the conviction that the conventional representations of law both in law schools and the courts cannot be taken at face value that the law as commonly conceived makes no sense The authors argue that the relentlessly normative prescriptions of American legal thinkers are frequently futile and indeed often pernicious They also argue that the failure to recognize the role that authorship must play in the production of legal thought plagues both the teaching and the practice of American law Ranging from the institutional to the psychological and metaphysical deficiencies of the American legal system the depth of criticism offered by Against the Law is unprecedented In a departure from the nearly universal legitimating and reformist tendencies of American legal thought this book will be of interest not only to the legal academics under attack in the book but also to sociologists historians and social theorists More particularly it will engage all the American lawyers who suspect that there is something very wrong with the nature and direction of their profession law students who anticipate becoming part of that profession and those readers concerned with the status of the American legal system

Astronomical and Magnetical and Meteorological Observations Made at the Royal Observatory, Greenwich, in the Year ... , 1857 *A Study of the Circulation of Ceramics in Cyprus from the 3rd Century BC to the 3rd Century AD* John Lund, 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods The island was by then no longer divided into kingdoms but unified politically first under Ptolemaic Egypt and later as a province in the Roman Empire Submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive Cypriot

character The ceramic evidence suggests otherwise The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence The similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness From the 1st century BC onwards Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output Also the ceramic record gradually became less diverse during the Roman Period than before developments which we today might be inclined to view as symptoms of an early form of globalisation Belgium
