Proceedings of the 2024 International Conference on Digital Economy and Marxist Economics (ICDEME 2024) Yongjun Guan,Yan Duan,Tao Wang,Chuan Liang,2024-12-31 This is an open access book 2024 International Conference on Digital Economy and Marxist Economics will be held grandly in Baise China from October 25 to 27 2024 2024 International Conference on Digital

Economy and Marxist Economics ICDEME2024 is organized to investigate the intersections between contemporary digital economic practices and the theoretical frameworks established by Marxist economics. In an era where digital innovation is reshaping traditional economic structures, it becomes increasingly pertinent to revisit and re-evaluate classical economic theories to understand these transformations. With rapid advancements in technology and the rise of the digital economy, there are extensive opportunities and challenges that need thoughtful analysis and discourse. This symposium serves as a platform for scholars, researchers, and practitioners to engage in meaningful discussions that bridge classical economic theories with the realities of modern digital economies. The primary aim of this symposium is to foster a comprehensive understanding of how Marxist economic principles can be applied to analyze and critique contemporary trends in the digital economy. The symposium seeks to promote interdisciplinary research, stimulate academic discussions, and offer new perspectives on the dynamics of digital capitalism. By bringing together experts from various fields, the conference aims to generate actionable insights that address both theoretical inquiries and practical implications. Additionally, it aspires to create a collaborative environment where participants can share research findings, exchange ideas, and develop strategies to leverage Marxist economic theories in understanding the complexities of our digital age. The 2024 symposium will explore a range of research themes designed to delve deep into the interplay between digital and Marxist economics. Key themes include Digital Labor and Capital, which examines how digital platforms alter labor relations and capital accumulation processes; Algorithmic Governance and Regulation, focusing on the role of algorithms in shaping economic behavior and the need for regulatory frameworks; and Data Commodification and Surveillance, which scrutinizes how data is transformed into a commodity and its implications for privacy and surveillance. Additionally, Marxist Theories in Digital Age invites scholars to reinterpret classical Marxist texts in the context of modern digital economies. By concentrating on these pertinent themes, the symposium aims to foster a nuanced understanding of digital economic phenomena through the lens of Marxist economics.
