Construction Project Management Peter Fewings, Christian Henjewe, 2019-03-21 Construction Project Management An Integrated Approach is a management approach to leading projects and the effective choice and use of project management tools and techniques It seeks to push the boundaries of project management to take on board future needs and user issues Integration of the construction project meaning closer relations between the project team the supply chain and the client is long overdue however despite some signs of growth in this area the industry nonetheless remains fragmented in its approach The role of the project manager is to integrate diverse interests and unify objectives to achieve a common goal This has now broadened to include a responsibility on the parts of both client and team to ensure that construction addresses current and future societal needs From an economic perspective a great deal of waste is connected with conflict thus a holistic approach that increases the efficiency and effectiveness of the task at hand will inject energy into project management This third edition now takes on board the impact of technology in building information modelling and other digitised technologies such as artificial intelligence Together they open up avenues for more direct and incisive action to test creative design manufacture directly and communicate spontaneously and intuitively In time such technologies will change the role of project managers but will never take away their responsibility to be passionate about construction and to integrate the team A new chapter has been added that considers future societal needs This edition is also reordered to make the project life cycle and process chapters clearer This book combines best practice in construction with the theories underpinning project management and presents a wealth of practical case studies many new It focuses on all construction disciplines that may manage projects The book is of unique value to students in the later years of undergraduate courses and those on specialist postgraduate courses in project management and also for practitioners in all disciplines and clients who

have experienced the frustration caused by the fragmentation of construction projects

Mental Health Promotion in Schools Carmel Cefai, Paul Cooper, 2017-06-09 The narratives of the children and young people school teachers and school leaders parents and carers policy makers and service managers and mental health workers and professionals presented in this book should provide an invaluable resource for all those involved in mental health promotion in school The insights drawn from these direct field experiences may help to inform policy and good practice and serve as an inspiration to schools in their efforts to introduce and promote mental health for their communities Most of the chapters present original research carried out in schools services universities and other contexts across different cultures Through various qualitative studies carried out in different cultural contexts Mental Health Promotion in Schools provides a platform for children teachers school leaders parents professionals policy makers and teacher educators to express their views on what works and does not work in mental health promotion in school In our continued quest for evidence based research we may tend to underestimate the value and significance of capturing the views and experiences of those most directly involved in mental health promotion such as children and young people school teachers and parents carers in seeking to enhance policy and practice in the area This book should be of particular interest to those involved in mental health promotion in school at practice training and research levels and we are sure that among these chapters they will discover many new and stimulating insights into the promotion of mental health in such complex systems as schools This is a timely book since mental health difficulties among children and young people are on the increase across the world The editors Carmel Cefai and Paul Cooper are passionate about the crucial role to be played by schools in creating safe spaces in which to learn develop and socialise They have spent many years in the development of creative initiatives for the promotion of emotional health and well being amongst young people The editors bring an international perspective to the issue of mental health and youth and show how important it is to collaborate and share expertise and knowledge Cefai and Cooper have assembled an impressive range of authors to share their knowledge and to show how initiatives can be adapted to a range of cultural contexts Helen Cowie Professor Faculty of Health and Medical Sciences University of Surrey UK

Methodological Approaches for Workplace Research and Management Chiara Tagliaro, Marko Orel, Ying Hua, 2023-09-14 This book explores a wide range of methodological approaches to examining various forms of workplace physical environments. It focuses on pressing questions regarding the relationship between the spatial component of the workplace including its progressive hybridisation with other physical and virtual places and its users be they public organisations private companies or start up businesses and solopreneurs. International contributors address a range of methods that are applicable both in research and practice to confront the most cutting edge workplace related issues. The assumption is that work has been changing thanks to the virtualisation of many activities and that homeworking and hybrid working modes are expected to increase significantly after Covid 19. Thus spaces hosting work need to adapt accordingly. Researchers and practitioners have been struggling to determine how much space will be needed by companies what kind of space will better host different work activities which workers are more suited for working from home and which instead are more productive if they have an office based working arrangement. The necessary evolution of the office should follow evidence based decisions on the abovementioned matters which are only possible through rigorous investigations. This volume aims to support these investigations which call for inventive applications of qualitative and quantitative methodologies. By doing so the book will encourage solid practices and thorough research agendas in workplace design management and use. Contributions come from different disciplines including facilities management real estate management psychology design architecture sociology and organisation studies. Chapters highlight the importance of appropriate methodologies borrowed from different fields in addressing contemporary questions and developments in workplaces. By analysing the challenges and opportunities for conducting rigorous research in different workplace settings this book will be critical reading for both academics and students as well as for decision makers and professionals who deal with workplace design and management.
