Sailing to the Edge of Time John Kretschmer, 2018-11-13 John Kretschmer is sailing s practical philosopher as much a doer as a thinker And that is the overarching theme of this chronicle of a sailing life Often amusing sometimes poignant occasionally terrifying but always inspiring his deeply personal account is a welcome reminder of the good life waiting at sea With hundreds of thousands of nautical miles under his keel John s adventures have taken him several times around the world with challenging crossings of the Atlantic and the Pacific a narrow escape from a coup in Yemen an unlikely deliverance from a coral reef off Belize as well as more serene introspective passages where trade winds are blowing and stories are flowing His crew has included CEOs actors writers teachers kids in essence everyone John s narrative is interwoven with practical tips and advice in seamanship but also and just as importantly his hard won insights about making the most of our lives He truly believes we find out who we really are and what we are capable of far from the shackles of land when we find a place where time changes shape days may merge into one another but minutes are memorable To live adventurously is to live more fully and that is the life John Kretschmer continues to live In this book he shares his simple profundities that will inspire those who live to sail and those seeking something more rewarding from life

the Heikell guides Ionian not only gives all the essential information you need but also exudes the charm and flavour of this corner of the Mediterranean Heikell's style is easy to digest and gives pleasure in the details of the history geography and social circumstances of the places described as well as the essential sailing information The Little Ship This book as well as being a practical manual on Ionian cruising seems to have absorbed much of the author's personal feelings regarding the charm which draws him back to it and any reader who has had a whiff of the magic spell of the Greek islands will sense this and inevitably renew the resolve to return and experience it once again in greater measure Nautical Magazine Rod Heikell nowadays is to the Mediterranean as gin is to tonic It is difficult to imagine sailing there without one of his guides Clear pilot notes chartlets and plentiful illustrations with entertaining commentaries on each place Up to date observations on local and national regulations The new edition does not disappoint If one must choose I would have no hesitation in recommending Heikell Cruising Association Rod has a knack for dropping in snippets of interest and colour to give the reader a feel for the atmosphere of each port or bay Yachting Monthly Like all Rod Heikell's pilots it is also a travel guide in its own right Ionian Magazine The sailing directions are particularly useful when entering the smaller anchorages and harbours for which little information is to be found on charts and include excellent harbour plans and top quality aerial photographs Flying Fish Magazine Ocean Cruising Club

Simulating Roman Economies Tom Brughmans, Andrew Wilson, 2022 The use of formal modelling and computational simulation in studies of the Roman economy has become more common over the last decade But detailed critical evaluations of this innovative approach are still missing and much needed What kinds of insights about the Roman economy can it lead to that could not have been obtained through more established approaches and how do simulation methods constructively enhance research processes in Roman Studies This edited volume addresses this need through critical discussion and convincing examples It presents the Roman economy as a highly complex system traditionally studied through critical examinations of material and textual sources and understood through a wealth of diverging theories A key contribution of simulation lies in its ability to formally represent diverse theories of Roman economic phenomena and test them against empirical evidence Critical simulation studies rely on collaboration across Roman data theory and method specialisms and can constructively enhance multivocality of theoretical debates of the Roman economy This potential is illustrated avoiding computational and mathematical language through simulation studies of a wealth of Roman economic phenomena from maritime trade and terrestrial transport infrastructures through the economic impacts of the Antonine Plague and demography to local cult economies and grain trade Through these examples and discussions this volume aims to provide the common ground guidance and inspiration needed to make simulation methods part of the tools of the trade in Roman Studies and to allow them to make constructive contributions to our understanding of the Roman economy

in every maritime zone are threatened both by activities directed at them such as treasure hunting and by activities incidentally affecting them such as mineral exploration and exploitation pipeline and cable laying dredging and fishing Since the first edition of this collection published in 1999 the urgent need for an international legal framework to regulate these activities has been formally recognised by the adoption in 2001 of the UNESCO Convention on the Protection of the Underwater Cultural Heritage While the prospects for this Convention remain uncertain it will undoubtedly have a profound influence on national laws and practice in this field This second collection of essays examines the present state of law policy and practice in sixteen different jurisdictions around the world in light of the 2001 Convention Among other things the viewpoint of each jurisdiction in respect of the Convention is considered and the impact that the Convention is already having and is likely to have in the future is explored Eight of the essays are entirely new and several additional jurisdictions are covered Finland the Federated States of Micronesia the Netherlands New Zealand and Norway The other essays have been thoroughly updated and revised to take account of the Convention The contributors come from a variety of backgrounds but all have specialist knowledge and experience of their particular jurisdiction and a keen interest in the field

Connected by the Sea Lucy Blue, Frederick M. Hocker, Anton Englert, 2016-03-31 The 10th International Symposium on Boat and Ship Archaeology was held in Roskilde Denmark in 2003 The theme of the meeting was Connected by the Sea and was designed to emphasize the role of the sea seafaring and watercraft as bridges rather than barriers Maritime archaeology tends to take place within national borders with a national focus yet the very premise of seafaring is the desire to travel beyond the horizon to establish contact with other places and cultures The conference theme was chosen to encourage the maritime archaeological community to think in international terms
