Spring 2013

CRITICAL RESPONSE PAPER

First, choose one of the following important theatrical tracts, all in Brandt:

Henri Bergson, "The Comic in Situations" (pp. 25-34)
Howard Barker, "Theatre without a Conscience" (pp. 55-61)
"The London Controversy; Tynan v. Ionesco" (pp. 208-214)
Stanislaw Witkiewicz, "On a New Type of Play" (pp. 182-187)

While sifting through your chosen critical work, be aware of your own entry point(s) into theatrical practice (acting, directing, costume design, etc.), as it will certainly inform your response to the theorist's words. Compose a fully-engaged response to the theorist, written in the first person, active voice, addressing his major points in any order you deem valuable. Be sure to consider both the THEORETICAL and PRACTICAL implications on the theatre as both you and the theorist see things. If you agree with the balance of the theorist's argument, then also consider how the ideas might be implemented in the American theatre of 2013 and beyond. If you disagree with the balance of the theorist's argument, then offer your own vision (insofar as the areas brought up by the chosen theorist), as concisely and cogently as possible.

Length should in the 3 to 5 pp. range (double-spaced, 10 to 12 font pitch), so get to the point as quickly as possible. In other words, a rambling, tangent-ridden manifesto is not a good thing. Let the author you've chosen be your guide for sticking to task and you'll be fine.

EVALUATION CRITERIA: Evidence of clear understanding of theorist's central points, clear and cogent argumentation. See attached sheet for breakdown. Graded out of 100 points.

It goes without saying at this point in your academic career (or, rather, it certainly should!) that the final document should be mechanically and stylistically flawless—meaning check the grammar and spelling!—and that all quotations of your theorist should be properly documented as per an accepted format: MLA, Chicago, etc. (This is covered in the fourth criterion for evaluation on said attached grading sheet.)

The first draft must be turned in to me no later than **February 4**; I will get drafts back as quickly as possible with an "advisory" grade (i.e. what you'd get if the first draft were a final draft), then you will prepare a final draft, which will be due **March 6**.

Fracture of Metals, Polymers, and Glasses L. Bonis, 2012-12-06 Elucidation of the various mechanisms responsible for fracture in different materials was the general subject of the Fourth Annual Symposium on Fundamental Phenomena in the Materials Sciences held January 31 and February 1 1966 in Boston and sponsored by the Ilikon Corporation of Natick Massachusetts In an analysis of the brittle to ductile transition in polycrystalline metals T L Johnston Ford Motor Company placed major emphasis on factors related to the plastic resistance associated with grain boundaries and the effects of plastic anisotropy Utilizing a generalized form of the Griffith criterion he said it can be readily shown that several individual factors may be made reasonably quantitative and that the nature of plastic response can be predicted Specifically it can be shown that a critical factor relates to the length of a plastic shear zone which is constrained by an elastically loaded matrix As this length increases the Griffith inequality is satisfied and brittle failure occurs however the use of decreased grain sizes or the refinement of dislocation or twin distribution can further tend to homogenize the plastic flow and to decrease the magnitude of the shear zone Of considerable importance in the consideration of plastic resistance is the availability of favorably oriented slip systems in an un sheared crystallite **Fiber Optic Lans, Part 1 1984-1988** ,1994 **ASME Technical Papers**

,1979 *Critical Information Infrastructures Security* Gregorio D'Agostino, Antonio Scala, 2018-09-08 This book constitutes revised selected papers from the 12th International Conference on Critical Information Infrastructures Security CRITIS 2017 held in Lucca Italy in October 2017 The 21 full papers and 4 short papers presented were carefully reviewed and selected from 63 submissions They present innovative research and explore new challenges in the field of critical information infrastructures protection C I IP and deal with multi disciplinary approaches to relevant C I IP problems **Successful College Writing with 2009 MLA and 2010 APA Updates** Kathleen T. McWhorter, 2010-05-19 Click here to find out more about the 2009 MLA Updates and the 2010 APA Updates Reading specialist Kathleen McWhorter understands that students

are often lacking in the skills they need to succeed in the first year writing course and need a text that doesn't assume they have mastered all the basics. Successful College Writing meets students where they are offering extensive instruction in careful and critical reading, practical advice on study and college survival skills, step by step strategies for writing and research, detailed coverage of the nine rhetorical patterns of development and 64 professional and student readings that provide strong rhetorical models as well as an easy to use handbook in the complete edition. McWhorter's unique visual approach to learning uses graphic organizers, revision flowcharts and other visual tools to help students analyze texts and write their own essays. Her unique attention to varieties of learning styles also helps empower students, allowing them to identify their strengths and learning preferences.

Deformation Characteristics of Geomaterials C.-K.

Chung, 2012-01-06 This book is the international edition of the proceedings of IS Seoul 2011, the Fifth International Symposium on Deformation Characteristics of Geomaterials held in Seoul, South Korea in September 2011. The book includes 7 invited lectures as well as 158 technical papers selected from the 182 submitted. The symposium explored ideas about the complex load deformation response in geomaterials including laboratory methods for small and large strains, anisotropy and localization, time dependent responses in soils, characteristics of treated, unsaturated and natural geomaterials, applications in field methods, evaluation of field performance in geotechnical structures and physical and numerical modeling in geomechanics. These topics were grouped under a number of main themes including experimental investigations from very small strains to beyond failure, behavior characterization and modeling of various geomaterials and practical prediction and interpretation of ground response, field observation and case histories. Both the symposium and this book represent an important contribution to the exchange of advanced knowledge and ideas in geotechnical engineering and promote partnership among participants worldwide.

Critical Perspectives on Emerging Economies Aswini Kumar Mishra, Vairam

Arunachalam, Debasis Patnaik, 2021-04-09 This volume offers fresh insights into economic development and growth in emerging economies.
