

Condensation

Water vapour in the air gets cold and changes back into liquid, forming clouds. This is called Condensation.

Evaporation

Evaporation is when the sun heats up water in rivers, lakes or the ocean and turns it into vapour or steam. The water vapour or steam then goes into the air.

Precipitation

Precipitation occurs when so much water has condensed that the air cannot hold it anymore. The clouds get heavy and water falls back to the earth in the form of rain, hail, sleet or snow.
