Morin,2018-01-04 Since the 2008 recession people s confidence in institutions has been in decline We re now far more interested in the recommendations of our peers than in traditional forms of advertising and marketing With our daily use of the Internet and social media we as consumers influence our communities and play active roles in the global economy We are Generation C a demographic that contains every computer user and online shopper on the planet and it s changing the way institutions brands and enterprises should do business and marketing This book explores the behaviours of the generations of connected consumers that make up Generation C to help you better understand your audience and how to target them effectively in the new consumer landscape Presented in four instalments and available online this new professional guide details and comments on recent expert market analyses with exclusive computer graphics and interviews Our Biggest Fight Frank H. McCourt, Jr.,2024-03-12 NATIONAL BESTSELLER The internet as we know it is broken Here s how we can seize back control of our lives from the corporate algorithms and create a better internet before it s too late In the spirit of Thomas Paine s Revolution era Common Sense this manifesto challenges us to create new digital architectures to safeguard democracy Walter Isaacson 1 New York Times bestselling author of Elon Musk It was once a utopian dream But today s internet despite its conveniences and connectivity is the primary cause of a pervasive unease that has taken hold in the U S and other democratic societies It s why youth suicide rates are rising why politics has become toxic and why our most important institutions are faltering Information is the lifeblood of any society and our current system for distributing it is corrupted at its heart Everything comes down to our ability to communicate openly and trustfully with each other But thanks to the dominant digital platforms and the ways they distort human behavior we have lost that ability while at the same time we ve been robbed of the data that is rightfully ours The roots of this crisis argue Frank McCourt and Michael Casey lie in the prevailing order of the internet In plain but forceful language the authors a civic entrepreneur and an acclaimed journalist show how a centralized system controlled by a small group of for profit entities has set this catastrophe in motion and eroded our personhood And then they describe a groundbreaking solution to reclaim it rather than superficial patchwork regulations we must reimagine the very architecture of the internet The resulting third generation internet would replace the

status quo with a new model marked by digital property rights autonomy and ownership Inspired by historical calls to action like Thomas Paine s Common Sense Our Biggest Fight argues that we must act now to embed the core values of a free democratic society in the internet of tomorrow Do it right and we will finally properly unlock its immense potential
