These specifications protect the safety of mobile phones that exceed a maximum exposure limit (expressed as the Specific Absorption Rate, or SAR) of 2.0 watts per kilogram of body tissue.

During testing, the maximum SAR measured for this model was 0.823 watts per kilogram. In normal use, the actual SAR is likely to be much lower, as the phone has been designed to emit only the RF energy necessary to transmit or signal to the nearest base station. By automatically switching power down when possible, your phone reduces your overall exposure to RF energy. The Declaration of Conformity of this manual demonstrates your phone's compliance with the European Radio & Telecommunications Equipment (R&TE) directive. For more information about the SAR and related EU standards, visit the Samsung mobile phone website.
