big data in agriculture environmental protection and healthcare Market Expansion and Social Dumping in Europe
Magdalena Bernaciak, 2015-06-05 The term social dumping regularly appears in public debates and in policymaking circles. However, due to its ambiguity, it is used in a manner that is convenient for individual discourse participants, thus opening the door for misconceptions and ill-grounded accusations. This book systematically examines social dumping in the context of the European integration process. It defines social dumping as the practice undertaken by self-interested market participants of undermining or evading existing social regulations with the aim of gaining a competitive advantage. It also shows how the two major EU integration projects, the creation of the Internal Market and EU enlargement to the east and to the south, have provided market actors with new incentives and opportunities to contest existing social constraints. The empirical chapters examine social dumping practices accompanying labour migration, employee posting, and cross-border investment distribution. In addition, they outline the process of formation of social standards and trace initiatives at EU and national levels that contribute to the spread of social dumping in Europe. This book will be of interest to scholars and students of employment relations, EU studies, international political economy, globalisation studies, welfare studies, social policy, and migration studies.

Knowledge Capture in Financial Regulation Eva Becker, 2016-04-12 Eva Becker assesses the US financial crisis as a crisis of regulatory data, information, and knowledge. Based on the Financial Crisis Inquiry Commission's interviews, as well as her own interviews and drawing on Capture Theory and recent reformulations thereof, she develops knowledge capture as a theoretic framework to assess financial regulation under conditions of 21st-century complexity.

The Regulation of Financial Planning in Australia Angelique Nadia Sweetman McInnes, 2019-08-20 This book investigates the legitimacy of the current Australian Financial Services Licensee Authorised Representative (AFSL AR) licensing model as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It takes into account theories in agency, legislation, legitimacy, and the independent individual regulatory regimes in other professions, thereafter integrating this framework with the financial planning theory to examine the legitimacy or what was found to be the illegitimacy of licensing advisers via multiple third-party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning/licensing model in Australia Federal Register, 2012-11

New Uses of Bourdieu in Film and Media Studies Guy Austin, 2016-07-01 Through his influential work on cultural capital and social mobility the French sociologist Pierre Bourdieu has provided critical insights into the complex interactions of power class and culture in the modern era Ubiquitous though Bourdieu s theories are however they have only intermittently been used to study some of the most important forms of cultural production today cinema and new media With topics ranging from film festivals and photography to constantly evolving mobile technologies this collection demonstrates the enormous relevance that Bourdieu s key concepts hold for the field of media studies deploying them as powerful tools of analysis and forging new avenues of inquiry in the process

Family-Run Universities in Japan Jeremy Breaden, Roger Goodman, 2020-07-03 Globally private universities enrol one in three of all higher education students In Japan which has the second largest higher education system in the world in terms of overall expenditure almost 80% of all university students attend private institutions According to some estimates up to 40% of these institutions are family businesses in the sense that members of a single family have substantive ownership or control over their operation This book offers a detailed historical sociological and ethnographic analysis of this important but largely under studied category of private universities as family business It examines how such universities in Japan have negotiated a period of major demographic decline since the 1990s their experiments in restructuring and reform the diverse experiences of those who worked and studied within them and above all their unexpected resilience It argues that this resilience derives from a number of inbuilt strengths of family business which are often overlooked in conventional descriptions of higher education systems and in predictions regarding the capacity of universities to cope with dramatic changes in their operating environment This book offers a new perspective on recent changes in the Japanese higher education sector and contributes to an emerging literature on private higher education and family business across the world
