High-Performance Bolting Technology for Offshore Oil and Natural Gas Operations National Academies of Sciences, Engineering, and Medicine, National Academy of Engineering, Division on Engineering and Physical Sciences, National Materials and Manufacturing Board, Committee on Connector Reliability for Offshore Oil and Natural Gas Operations, 2018-06-12 Commercially significant amounts of crude oil and natural gas lie under the continental shelf of the United States. Advances in locating deposits and improvements in drilling and recovery technology have made it technically and economically feasible to extract these resources under harsh conditions. But extracting these offshore petroleum resources involves the possibility, however remote, of oil spills with resulting damage to the ocean and the coastline ecosystems and risks to life and limb of those performing the extraction. The environmental consequences of an oil spill can be more severe underwater than on land because sea currents can quickly disperse the oil over a large area and thus cleanup can be problematic. Bolted connections are an integral feature of deep water well operations. High Performance Bolting Technology for Offshore Oil and Natural Gas Operations summarizes strategies for improving the reliability of fasteners used in offshore oil exploration equipment as well as best practices from other industrial sectors. It focuses on critical bolting bolts, studs, nuts, and fasteners used on critical connections.

Cognitive Linguistics - Foundations of Language Ewa Dąbrowska, Dagmar Divjak, 2019-07-08 Cognitive foundations of language introduces the reader to the abilities and processes in which research in Cognitive Linguistics is grounded. The book looks at key concepts such as embodiment, salience, entrenchment, construal, categorization, and collaborative communication and discusses their genesis and implications for cognitive linguistic research.

Handbook of Cognitive Linguistics Ewa Dąbrowska, Dagmar Divjak, 2015-05-19 Cognitive Linguistics is an approach to language study based on the assumptions that our linguistic abilities are firmly rooted in our cognitive abilities, that meaning is essentially conceptualization, and that grammar is shaped by usage. The Handbook of Cognitive Linguistics provides state-of-the-art overviews of the numerous subfields of cognitive linguistics written by leading international experts which will be useful for established researchers and novices alike. It is an interdisciplinary project with contributions from linguists, psycholinguists, psychologists, and computer scientists which will emphasise the most recent developments in the field, in particular the shift towards more empirically based research. In this way it will, we hope, help to shape the field, encouraging methodologically more rigorous research which incorporates insights from all the cognitive sciences. Editor Ewa Dąbrowska was awarded the Alexander von Humboldt Professorship 2018.

Tomasulo, 2022-11-14 **Development of executive function during childhood** Yusuke Moriguchi, Philip D

Zelazo, Nicolas Chevalier, 2016-04-01 Executive function refers to the goal oriented regulation of one's own thoughts actions

and emotions Its importance is attested by its contribution to the development of other cognitive skills e.g. theory of mind

social abilities e.g. peer interactions and academic achievement e.g. mathematics and by the consequences of deficits in

executive function which are observed in wide range of developmental disorders such as attention deficit hyperactivity

disorder and autism Over the last decade there have been growing interest in the development of executive function and an

expanding body of research has shown that executive function develops rapidly during the preschool years with adult level

performance being achieved during adolescence or later This recent work together with experimental research showing the

effects of interventions targeting executive function has yielded important insights into the neurocognitive processes

underlying executive function Given the complexity of the construct of executive function however and the multiplicity of

underlying processes there are often inconsistencies in the way that executive function is defined and studied This

inconsistency has hampered communication among researchers from various fields This Research Topic is intended to bridge

this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding

childhood executive function Researchers using various methods including behavioral experiments neuroimaging eye

tracking computer simulation observational methods and questionnaires are encouraged to contribute original empirical

research In addition to original empirical articles theoretical reviews and opinions perspective articles on promising future

directions are welcome We hope that researchers from different areas such as developmental psychology educational

psychology experimental psychology neuropsychology neuroscience psychiatry computational science etc will be represented

in the Research Topic Editorial: Best Practice Approaches for Mixed Methods Research in Psychological Science M.

Insights in sports social science Hans Westerbeek, Gayle McPherson, Jess C. Dixon, 2023-06-22 Piety in Pieces
Kathryn M. Rudy, 2016-09-26 Medieval manuscripts resisted obsolescence Made by highly specialised craftspeople scribes
illuminators book binders with labour intensive processes using exclusive and sometimes exotic materials parchment made
from dozens or hundreds of skins inks and paints made from prized minerals animals and plants books were expensive and
built to last They usually outlived their owners Rather than discard them when they were superseded book owners found
ways to update amend and upcycle books or book parts These activities accelerated in the fifteenth century Most
manuscripts made before 1390 were bespoke and made for a particular client but those made after 1390 especially books of
hours were increasingly made for an open market in which the producer was not in direct contact with the buyer Increased
efficiency led to more generic products which owners were motivated to personalise It also led to more blank parchment in
the book for example the backs of inserted miniatures and the blank ends of textual components Book buyers of the late
fourteenth and throughout the fifteenth century still held onto the old connotations of manuscripts that they were custom
made luxury items even when the production had become impersonal Owners consequently purchased books made for an
open market and then personalised them filling in the blank spaces and even adding more components later This would give
them an affordable product but one that still smacked of luxury and met their individual needs They kept older books in
circulation by amending them attached items to generic books to make them more relevant and valuable and added new
prayers with escalating indulgences as the culture of salvation shifted Rudy considers ways in which book owners adjusted
the contents of their books from the simplest add a marginal note sew in a curtain to the most complex take the book apart

embellish the components with painted decoration add more quires of parchment By making sometimes extreme adjustments book owners kept their books fashionable and emotionally relevant This study explores the intersection of codicology and human desire Rudy shows how increased modularisation of book making led to more standardisation but also to more opportunities for personalisation She asks What properties did parchment manuscripts have that printed books lacked What are the interrelationships among technology efficiency skill loss and standardisation
