Statutes and Ordinances of the University of Cambridge 2015 University of Cambridge, 2015-10-08 The official Statutes and Ordinances of the University of Cambridge **Emerging Practices for Online Language Assessment, Exams, Evaluation, and Feedback** Gokturk-Saglam, Asli Lidice, Sevgi-Sole, Ece, 2023-06-29 The advancement of digital tools has enabled the development of online language assessments exams evaluations and feedback Nonetheless the language assessment literacy required of a teacher today is of a completely different kind one that is adapted to the digital environment and altered for the pedagogical approaches of our new norm There is a scarcity of literature addressing the challenges of in person to online assessments exams evaluations and feedback particularly in the time of the COVID 19 education crisis Emerging Practices for Online Language Assessment Exams Evaluation and Feedback investigates the main challenges of online language assessment when migrating from an in class to an online environment due to academic integrity adaptation to the new testing environment technical problems and anxiety Covering key topics such as parental involvement self assessment and language learners this premier reference source is ideal for administrators policymakers industry professionals researchers academicians scholars practitioners instructors and students Meeting the Challenges to Measurement in an Era of Accountability Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of

consecutive tests such as in mathematics or English language arts with a focus on grades 4-8. Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end of course tests as well as alternative measures such as portfolios, exhibitions and student learning objectives. In each case, issues related to design and development, psychometric considerations and validity challenges are covered from both a generic and a content specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment. Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. Preventing Bullying Through Science, Policy, and Practice National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Board on Children, Youth, and Families, Committee on the Biological and Psychosocial Effects of Peer Victimization: Lessons for Bullying Prevention, 2016-09-14 Bullying has long been tolerated as a rite of passage among children and adolescents There is an implication that individuals who are bullied must have asked for this type of treatment or deserved it

Sometimes even the child who is bullied begins to internalize this idea For many years there has been a general acceptance and collective shrug when it comes to a child or adolescent with greater social capital or power pushing around a child perceived as subordinate But bullying is not developmentally appropriate it should not be considered a normal part of the typical social grouping that occurs throughout a child s life Although bullying behavior endures through generations the milieu is changing Historically bullying has occurred at school the physical setting in which most of childhood is centered and the primary source for peer group formation In recent years however the physical setting is not the only place bullying is occurring Technology allows for an entirely new type of digital electronic aggression cyberbullying which takes place through chat rooms instant messaging social media and other forms of digital electronic communication Composition of peer groups shifting demographics changing societal norms and modern technology are contextual factors that must be considered to understand and effectively react to bullying in the United States Youth are embedded in multiple contexts and each of these contexts interacts with individual characteristics of youth in ways that either exacerbate or attenuate the association between these individual characteristics and bullying perpetration or victimization Recognizing that bullying behavior is a major public health problem that demands the concerted and coordinated time and attention of parents educators and school administrators health care providers policy makers families and others concerned with the care of children this report evaluates the state of the science on biological and psychosocial consequences of peer victimization and the risk and protective factors that either increase or decrease peer victimization behavior and consequences
