## **Physical Science PSeptember 2013 Memo:**

**Crime, Violence, and Global Warming** John Crank, Linda Jacoby, 2015-05-20 Crime Violence and Global Warming introduces the many connections between climate change and criminal activity Conflict over natural resources can escalate to state and non state actors resulting in wars asymmetrical warfare and terrorism Crank and Jacoby apply criminological theory to each aspect of this complicated web helping readers to evaluate conflicting claims about global warming and to analyze evidence of the current and potential impact of climate change on conflict and crime Beginning with an overview of the science of global warming the authors move on to the links between climate change scarce resources and crime Their approach takes in the full scope of causes and consequences present and future in the United States and throughout the world The book concludes by looking ahead at the problem of forecasting future security implications if global warming continues or accelerates This fresh approach to the criminology of climate change challenges readers to examine all sides of this controversial question and to formulate their own analysis of our planet s future

**Convergence** National Research Council, Division on Earth and Life Studies, Board on Life Sciences, Committee on Key Challenge Areas for Convergence and Health, 2014-06-16 Convergence of the life sciences with fields including physical chemical mathematical computational engineering and social sciences is a key strategy to tackle complex challenges and achieve new and innovative solutions However institutions face a lack of guidance on how to establish effective programs what challenges they are likely to encounter and what strategies other organizations have used to address the issues that arise This advice is needed to harness the excitement generated by the concept of convergence and channel it into the policies structures and networks that will enable it to realize its goals Convergence investigates examples of organizations that have established mechanisms to support convergent research This report discusses details of current programs how organizations have chosen to measure success and what has worked and not worked in varied settings The report summarizes the lessons learned and provides organizations with strategies to tackle practical needs and implementation challenges in areas such as infrastructure student education and training faculty advancement and inter institutional partnerships

*Disorder and the Disinformation Society* Jonathan Paul Marshall, James Goodman, Didar Zowghi, Francesca da Rimini, 2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society Through an investigation of informationalism defined as a contemporary form of capitalism it describes the social processes producing informational disorder While most social theory sees disorder as secondary pathological or uninteresting this book takes disordering processes as central to social life The book engages with theories of information society which privilege information order offering a strong counterpoint centred on disinformation Disorder and the Disinformation Society offers a practical agenda arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism It outlines the dynamics of software failure as

they impinge on of information workers and on daily life explores why computerized finance has become inherently self disruptive asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship and reveals how social media can extend but also distort the development of social movements *Data Management* Margaret E. Henderson, 2016-10-25 Libraries organize information and data is information so it is natural that librarians should help people who need to find organize use or store data Organizations need evidence for decision making data provides that evidence Inventors and creators build upon data collected by others All around us people need data Librarians can help increase the relevance of their library to the research and education mission of their institution by learning more about data and how to manage it Data Management will guide readers through Understanding data management basics and best practices Using the reference interview to help with data management Writing data management plans for grants Starting and growing a data management service Finding collaborators inside and outside the library Collecting and using data in different disciplines **The Medical Library Association Guide to Data Management for Librarians** Lisa Federer, 2016-09-15 Technological advances and the rise of collaborative interdisciplinary approaches have changed the practice of research The 21st century researcher not only faces the challenge of managing increasingly complex datasets but also new data sharing requirements from funders and journals Success in today's research enterprise requires an understanding of how to work effectively with data yet most researchers have never had any formal training in data management Libraries have begun developing services and programs to help researchers meet the demands of the data driven research enterprise giving librarians exciting new opportunities to use their expertise and skills The Medical Library Association Guide to Data Management for Librarians highlights the many ways that librarians are addressing researchers changing needs at a variety of institutions including academic hospital and government libraries Each chapter ends with pearls of wisdom a bulleted list of 5-10 takeaway messages from the chapter that will help readers quickly put the ideas from the chapter into practice From theoretical foundations to practical applications this book provides a background for librarians who are new to data management as well as new ideas and approaches for experienced data librarians Open Scientific Data Vera Lipton, 2020-01-22 This book shows how the vision for open access to scientific data can be more readily achieved through a staged model that research funders policy makers scientists and research organizations can adopt in their practice Drawing on her own experiences with data processing on early findings with open scientific data at CERN the European Organization for Nuclear Research and from case studies of shared clinical trial data the author updates our understanding of research data what it is how it dynamically evolves across different scientific disciplines and across various stages of research practice and how it can and indeed should be shared at any of those stages The result is a flexible and pragmatic path for implementing open scientific data **Navigating the Clean Water Act** United States.
