Phenomenology is the philosophy of our times Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl Now its seminal ideas have been handed over to a new era The worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology s universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl s project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy s progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond The key concepts and phases of Husserl s thought are here exfoliated Then the thought of the movement s classical figures and of representative thinkers in succeeding generations is elucidated Phenomenology s geographic spread is reviewed We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences Lastly the phenomenological project s new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon Here is the movement s vanguard This collection has 71 entries Each entry is followed by a relevant bibliography There is a helpful Glossary of Terms and an Index of Names *Worldwide Experiences and Trends in Sport for All* Lamartine Pereira da Costa,Ana Miragaya,2002 This collective volume contributes to a growing debate concerning the extent to which we are now living in a global society shaped by sport in addition to economy technology and so on It covers 36 countries from five

continents analyzed by 87 contributors so it offers a large comparative study It is also a data bank of national information resources for students researchers policy makers sports leaders and managers By means of a standard framework used in all chapters the collected data from national cases on history management and culture of sport provide interpretations of marketing sponsorship finance target groups settings for activities strategy of promotion and social changes as related to Sport for All This cross national approach seeks to offer adequate meaning to the practices of each country stimulating further research on specific themes of physical activities for health and leisure either in affluent or poor social conditions The concluding chapter lays the groundwork of Sport for All
