*"Humanity is going to need a substantial new way of thinking if it is to survive"*  
*Albert Einstein*

*"Life is either a daring adventure or nothing. Security does not exist in nature,  
nor do children of men as a whole experience it. Avoid danger is no safer in the  
long run than exposure!"*

*Helen Keller (1880 – 1968), US blind and deaf educator*

### **1. Introduction**

Research is a careful study of a subject, especially in order to discover new facts or information about it. From this simple definition three ingredients are very important about Research 'carefulness', 'discovery of new facts' and 'search for information'.

In the last decades, many disasters confronted man; examples are earthquakes, and tremors, disease and syndromes like HIV/AIDS, Sars, Swine flu and Bird flu, Issues of global warming, volcanic ash and oil spillages that has led to tremendous economic loss. Many disasters like Tsunamis, Tornadoes and Earthquakes etc had led to tremendous loss of lives globally.

Man is everywhere in danger and avoidance of it as Helen Keller said, is no safer either. Then what is the way out of the problems facing human on earth today? The answer to the question is simple and it is contained in Albert Einstein's Philosophy. We need new ways of thinking and doing things for us to survive. We need Research to fashion out solutions to the emerging problems confronting man and to design a new society with new ways of doing things in the right way that would suit our existence in the planet earth.

The origin of science is difficult to trace but William Whewell coined the word 'Scientist' in 19<sup>th</sup> Century [4]. Science can be divided into basically two. Physical and Biological Sciences. Physical science deals with the study of physical properties of Matter, Space, Time and Energy while biological science deals with life and its attributes.
