Q. Explain with reason.

Q10. If a man jumps out from a boat, the boat moves backwards why

Reason : -

Newton's third law of motion states that every action has an equal and opposite reaction. In this case , when the man jumps out of the boat, it exerts force on the boat. This is the action. As a reaction, the boat exerts an

Worlds without End Mary-Jane Rubenstein, 2014-01-28 A religion professor elucidates the theory of the multiverse its history and its reception in science philosophy religion and literature Multiverse cosmologies imagine our universe as just one of a vast number of others Beginning with ancient Atomist and Stoic philosophies Mary Jane Rubenstein links contemporary models of the multiverse to their forerunners and explores the reasons for their recent appearance One concerns the so called fine tuning of the universe nature s constants are so delicately calibrated that it seems they have been set just right to allow life to emerge For some thinkers these fine tunings are evidence of the existence of God for others however and for most physicists God is an insufficient scientific explanation Hence the multiverse s allure if all possible worlds exist somewhere then like monkeys hammering out Shakespeare one universe is bound to be suitable for life Of course this hypothesis replaces God with an equally baffling article of faith the existence of universes beyond before or after our own eternally generated yet forever inaccessible to observation or experiment In their very efforts to sidestep metaphysics theoretical physicists propose multiverse scenarios that collide with it and even produce counter theological narratives Far from invalidating multiverse hypotheses Rubenstein argues this interdisciplinary collision actually secures their scientific viability We may therefore be witnessing a radical reconfiguration of physics philosophy and religion in the modern turn to the multiverse Rubenstein s witty thought provoking history of philosophy and physics leaves one in awe of just how close Thomas Aquinas and American physicist Steven Weinberg are in spirit as they seek ultimate answers Publishers Weekly A fun

2014 by CHOICE Einstein Relatively Simple brings together for the first time an exceptionally clear explanation of both
special and general relativity It is for people who always wanted to understand Einstein s ideas but never thought they could
Told with humor enthusiasm and rare clarity this entertaining book reveals how a former high school drop out revolutionized
our understanding of space and time From E mc2 and everyday time travel to black holes and the big bang Einstein
Relatively Simple takes us all regardless of our scientific backgrounds on a mind boggling journey through the depths of
Einstein s universe Along the way we track Einstein through the perils and triumphs of his life follow his thinking his logic
and his insights and chronicle the audacity imagination and sheer genius of the man recognized as the greatest scientist of
the modern era In Part I on special relativity we learn how time slows and space shrinks with motion and how mass and
energy are equivalent Part II on general relativity reveals a cosmos where black holes trap light and stop time where
wormholes form gravitational time machines where space itself is continually expanding and where some 13.7 billion years
ago our universe was born in the ultimate cosmic event the Big Bang *Notes and Queries: A Medium of*

Young,2016-12-05 As he demonstrates that narratives of seduction function as a master plot for French literature in the

eighteenth century Paul Young argues that the prevalence of this trope was a reaction to a dominant cultural discourse that coded the novel and the new practice of solitary reading as dangerous seductive practices Situating his study in the context of paintings educational manuals and criticism that caution against the act of reading Young considers both canonical and lesser known works by authors that include Rousseau Sade Bastide Laclos Crillon and the writers of two widely read libertine novels How these authors responded to a cultural climate that viewed literature and especially the novel as seductive sheds light on the perils and pleasures of authorship the ways in which texts interact with the larger cultural discourse and what eighteenth century texts tell us about the dangers of reading or writing Ultimately Young argues the seduction not in the text but by the text raises questions about the nature of pleasure in eighteenth century French literature and culture

Productive Multivocality in the Analysis of Group Interactions Daniel D. Suthers, Kristine Lund, Carolyn Penstein Rosé, Chris Teplov, Nancy Law, 2013-12-02 The key idea of the book is that scientific and practical advances can be obtained if researchers working in traditions that have been assumed to be mutually incompatible make a real effort to engage in dialogue with each other comparing and contrasting their understandings of a given phenomenon and how these different understandings can either complement or mutually elaborate on each other This key idea applies to many fields particularly in the social and behavioral sciences as well as education and computer science The book shows how we have achieved this by presenting our study of collaborative learning during the course of a four year project Through a series of five workshops involving dozens of researchers the 37 editors and authors involved in this project studied and reported on collaborative learning technology enhanced learning and cooperative work The authors share an interest in understanding group interactions but approach this topic from a variety of traditional disciplinary homes and theoretical and methodological traditions This allows the book to be of use to researchers in many different fields and with many different goals and agendas
