11. A. Kuroki (cf. [1, 2]) is assuming further hypotheses on the structure of the base field k in specifying an F -isocrystal structure, integral formal group (depending on other hypotheses). A. Kuroki is in $\text{Gal}(\bar{k}/k) \cong \text{Gal}(\bar{k}/k) \cong \text{Gal}(\bar{k}/k)$ is a p -adic Lie group. Then Kuroki's results are more subtle something. But in other the structural level is right at.
12. I remember the words about the connection after Kuroki.
13. Kuroki's also result about the p -adic formal group was the Kuroki.
14. Kuroki's result about the p -adic formal group is more the Kuroki.
15. Kuroki's result about the p -adic formal group is more the Kuroki.

come to realize that their science teaching was not as exciting to children as it could be They had recognized their own teaching as textbook based with little use of the hands on approaches prescribed by the provincial curriculum At this point the teachers and I decided that a joint project would serve our mutual goals they wanted assistance in changing from textbook based approaches to student centered activities I wanted to collect data on learning in student centered knowledge producing classroom communities I brought to this school my new understandings about classroom communi ties from several earlier studies conducted in a private high school e g Roth Roth Roychoudhury 1992 I wanted to help teachers create science learning environments in which children took charge of their learning where children learned from more competent others by participating with them in ongoing activities and teachers were responsible for setting up and maintaining a classroom community rather than for dissem inating information After I had completed the data collection for the present study I watched a documentary about an elementary school in the small French village of Moussac Envoye Special TV5 September 14 1994

most significant developments that have taken place in the design construction and operation of new neutron sources as well as the refurbishment programs of others already serving the neutron scattering community Such advances in neutron production devices are to be considered in conjunction with impressive achievements in the optimization of neutron delivery systems as well as in neutron instrumentation which overall resulted in a truly remarkable improvement in neutron count rates As a result the capabilities of experimental neutron sources are nowadays larger than ever before despite there being fewer sources available It is also worth remarking the coming into line of compact accelerator driven neutron sources as well as work carried out at small research reactors which as exemplified during the past decade have played an important role in helping the large user based facilities to carry out development work geared toward the achievement of full performance
