

Managerial Accounting Comprehensive Exam – Practice Problems

The “Big Themes” in managerial accounting are the following:

1. Fixed versus variable costs and the related concept of operating leverage.
2. Product versus period costs.
3. Direct and indirect materials and direct and indirect labor.
4. Manufacturing overhead (MO) – development of the predetermined rate, how MO is allocated to work in process, and what to do with over/underapplied MO (you need to know **ONLY** the close out to cost of goods sold method).
5. Job order costing.
6. Process costing – using the weighted-average method (you **DO NOT** need to know the FIFO method).
7. The Contribution Format income statement and Cost-Volume-Profit analysis.
8. Absorption costing versus variable costing.
9. Standard costs and variance analysis.
10. Static versus flexible budgets.
11. Profit planning and budgeting (but you **DO NOT** need to prepare a master budget for the exam).

Practice Problems:

1. Whitman Corporation, a merchandising company, reported sales of 7,400 units for May at a selling price of \$577 per unit. The cost of goods sold (all variable) was \$411 per unit. Selling expense was a mixed cost with a variable component of \$54 per unit and a fixed component of \$145,600. Administrative expense was also a mixed cost with a variable component of \$24 per unit and a fixed component of \$370,400. Finally, the company had \$66,000 of depreciation expense.

Required:

- a. Prepare a contribution format income statement for May.
2. Delta Company (Delta) is a manufacturing firm that uses job-order costing. The company's inventory balances were as follows at the beginning and end of the year:

| Month | Beginning Balance | Ending Balance |
|-----------------|-------------------|----------------|
| Raw materials | \$11,000 | \$15,000 |
| Work in process | \$32,000 | \$14,000 |
| Finished goods | \$108,000 | \$123,000 |

Delta applies overhead to jobs using a predetermined overhead rate based on machine-hours. At the beginning of the year, the company estimated that it would work 17,000 machine-hours
