Opportunity to Learn, Curriculum Alignment and Test Preparation Jaap Scheerens, 2016-08-30 This book provides a review of the effectiveness of Opportunity to Learn OTL operationalized as the association between OTL and student achievement In addition it presents an elaborate conceptual map in which OTL is regarded as part of a larger concept of curriculum alignment Major components of this framework are national goals and standards school curricula formative tests textbooks actual delivery of content as part of teaching and summative tests and examinations Alignment between educational goals intended and implemented curricula and educational outcomes is considered an important prerequisite for effective education The expectation is that better alignment leads to better student performance The concept of OTL is commonly used to compare content covered as part of the implemented curriculum with student achievement As such it is to be seen as a facet of the broader concept of alignment As it comes to enhancing OTL in educational policy and practice

proactive curriculum development is compared to a more retroactive orientation. Legitimate forms of test and examination preparation belong to this retroactive orientation and are seen as favorable conditions for optimizing OTL. This book reviews the research evidence on the effects of OTL on student achievement by means of detailed descriptions of key empirical studies, a review of meta-analyses, a vote count, syntheses of 51 empirical studies conducted between 1995 and 2015, and a secondary analysis based on TIMSS 2011 and PISA 2012 data. It concludes that the effect size of OTL at about 30 is modest but comparable in size to other effectiveness-enhancing conditions in schooling. The final chapter of the book provides suggestions for educational policy and practice to further optimize OTL.

Using Developmentally Appropriate Practices to Teach the Common Core Lisa S. Goldstein, 2015-07-16. Using Developmentally Appropriate Practices to Teach the Common Core Grades PreK-3 provides current and prospective primary grade teachers with an understanding of the CCSS ELA and CCSS M that highlights their compatibility with developmentally appropriate practices (DAP), the instructional approach generally preferred by teachers of young children. The book begins by framing the CCSS as a distinct improvement over lengthy lists of academic content standards and as a carefully conceptualized and DAP-friendly set of curriculum guidelines. Next, the CCSS ELA and CCSS M for Grades K-3 are unpacked, analyzed, synthesized, and cross-referenced to key features of DAP. Finally, several hot-topic issues differentiating instruction to meet the needs of all learners, ensuring equitable access to the curriculum for English Language Learners, addressing assessment and accountability expectations, and educating parents and families about the CCSS and DAP are prioritized and examined in depth. *Using Developmentally Appropriate Practices to Teach the Common Core* Grades PreK-3 is a highly useful guide for both pre-service and in-service early childhood education teachers.

Predictive Models for School Leadership and Practices Amzat, Ismail Hussein, 2018-09-07. A successful administrator is one who applies suitable or appropriate leadership styles in various situations or contexts. It is crucial to investigate how effective administrators lead their organizations in challenging and difficult times as well as promote the accomplishments of their organization. *Predictive Models for School Leadership and Practices* is an essential reference source that discusses academic administration as well as administrative effectiveness in achieving organizational goals. Featuring research on topics such as teacher collaboration, school crisis management, and ITC integration, this book is ideally designed for principals, researchers, academics, educational policymakers, and teachers seeking coverage on academic leadership and leadership models.

Advances in Human Factors in Training, Education, and Learning Sciences Salman Nazir, Anna-Maria Teperi, Aleksandra Polak-Sopińska, 2018-06-27. This book focuses on the importance of human factors in optimizing the learning and training process. It reports on the latest research and best practices and discusses key principles of behavioral and cognitive science which are extremely relevant to the design of instructional content and new technologies to support mobile and multimedia learning, virtual training, and web-based learning among others, as well as performance measurements, social and adaptive learning, and many other types of educational technologies with a special emphasis on those important in

the corporate higher education and military training contexts Based on the AHFE 2018 Conference on Human Factors in Training Education and Learning Sciences held July 21 25 2018 in Orlando Florida USA on July 21 25 2018 the book offers a timely perspective on the role of human factors in education It highlights important new ideas and will fosters new discussions on how to optimally design learning experiences

Executive Function and Education Mariëtte Huizinga,Dieter Baeyens,Jacob A. Burack,2018-09-21 Executive function is an umbrella term for various cognitive processes that are central to goal directed behavior thoughts and emotions These processes are especially important in novel or demanding situations which require a rapid and flexible adjustment of behavior to the changing demands of the environment The development of executive function relies on the maturation of associated brain regions as well as on stimulation in the child s social contexts especially the home and school Over the past decade the term executive function has become a buzzword in the field of education as both researchers and educators underscore the importance of skills like goal setting planning and organizing in academic success Accordingly in initiating this Research Topic and eBook our goal was to provide a forum for state of the art theoretical and empirical work on this that both facilitates communication among researchers from diverse fields and provides a theoretically sound source of information for educators The contributors to this volume who hail from several different countries in Europe and North America have certainly accomplished this goal in their nuanced and cutting edge depictions of the complex links among various executive function components and educational success

The Charisma Machine Morgan G. Ames,2019-11-19 A fascinating examination of technological utopianism and its complicated consequences In The Charisma Machine Morgan Ames chronicles the life and legacy of the One Laptop per Child project and explains why despite its failures the same utopian visions that inspired OLPC still motivate other projects trying to use technology to disrupt education and development Announced in 2005 by MIT Media Lab cofounder Nicholas Negroponte One Laptop per Child promised to transform the lives of children across the Global South with a small sturdy and cheap laptop computer powered by a hand crank In reality the project fell short in many ways starting with the hand crank which never materialized Yet the project remained charismatic to many who were captivated by its claims of access to educational opportunities previously out of reach Behind its promises OLPC like many technology projects that make similarly grand claims had a fundamentally flawed vision of who the computer was made for and what role technology should play in learning Drawing on fifty years of history and a seven month study of a model OLPC project in Paraguay Ames reveals that the laptops were not only frustrating to use easy to break and hard to repair they were designed for technically precocious boys idealized younger versions of the developers themselves rather than the children who were actually using them The Charisma Machine offers a cautionary tale about the allure of technology hype and the problems that result when utopian dreams drive technology development
