Electroconvulsive and Neuromodulation Therapies Conrad M. Swartz, 2009-03-02 Electroconvulsive therapy ECT is a psychiatric treatment involving the induction of a seizure through the transmission of electricity in the brain Because of exploitation movies and greatly heightened drug company promotional activities ECT was used less frequently in the 1980s and 1990s Eventually these movies were understood as unrealistic Now these drugs are increasingly recognized as dangers to body health Because of recent refinements and a far better scientific understanding of the clinical procedures and mechanisms underpinning ECT this treatment modality has seen a resurgence in use and widespread appreciation of its safety This book is the new definitive reference on electroconvulsive and neuromodulation therapies It comprehensively covers the scientific basis and clinical practice of ECT as well as comparisons between ECT and medication therapies including the new generation of antipsychotic drugs It also provides readers with administrative perspectives and specific details for the management of this modality in clinical practice The new forms of nonconvulsive electrical and magnetic brain stimulation therapy are also covered in detail in a separate section The chapter authors are leading scholars and clinicians

Króliczak, Claudia L. R. Gonzalez, David P. Carey, 2019-08-15 Whereas the cerebral specialization for skilled manual actions praxis seems closely linked to dominance for language with both functions left lateralized in the vast majority of humans the neural correlates of hand preference are still less well understood Indeed as a combination of inherited and non inherited genomic factors i e direct parental and concealed environmental contributions handedness in contrast to language is less likely to have strong genetic indices and clearly lateralized functional organization What about eye dominance unimanual and bimanual object manipulation and gestures or attentional systems and the related egocentric or allocentric coding of space Are these different categories functionally and structurally interconnected Is their development and contribution to task performance linked even if they are differently lateralized How are they connected to language learning or its development In trying to understand these relationships and their neural underpinnings we obtain a new insight into fundamental human behaviors which depend either on shared or distinct cerebral resources that must nevertheless be harmonized by higher order cerebral processing In this Research Topic we assembled a dozen of original research contributions as well as articles with more theoretically driven perspectives that directly speak to these issues Hopefully this work will serve as a foundation for further discussions and will stimulate new research in this fascinating domain **Social Media in Medicine** Margaret Chisolm, 2018-02-05 The use of social media around the world has exploded in recent years with the number of monthly active users of Facebook and Twitter estimated to be one billion and one quarter billion respectively Physicians and medical trainees are among the users of social media raising questions of how Facebook Twitter and other novel online tools may best be harnessed to further medical research patient care and educational pursuits Because social media enables an immediate exchange of information and ideas around shared areas of interest it has fostered communication and collaboration among a global network of researchers clinicians patients and learners Social Media in Medicine reviews a range of topics from research ethics to medical education and includes personal reflections by clinicians and learners that represent diverse opinions about the role of social media in medicine The book is relevant to all healthcare stakeholders and will hopefully encourage ideas and questions to generate more research into the use of social media in medical research patient care and education This book was originally published as a special issue of the International Review of Psychiatry Manual of Classical Literature Johann Joachim Eschenburg, 1850 **Guide to Reprints** , 2009 *Guide to Reprints* Albert James Diaz, 2008 Manual of Classical Literature.
