Barnett, 2010-02-23 The Barnett Ziegler Byleen and Sobecki College Algebra series is designed to be user friendly and to
maximize student comprehension by emphasizing computational skills ideas and problem solving as opposed to mathematical
theory Suitable for either one or two semester college algebra with trigonometry or precalculus courses Precalculus
introduces a unit circle approach to trigonometry and includes a chapter on limits to provide students with a solid foundation
for calculus concepts The large number of pedagogical devices employed in this text will guide a student through the course
Integrated throughout the text students and instructors will find Explore Discuss boxes which encourage students to think
critically about mathematical concepts In each section the worked examples are followed by matched problems that reinforce
the concept being taught In addition the text contains an abundance of exercises and applications that will convince students
that math is useful A MathZone site featuring algorithmic exercises videos and other resources accompanies the text
