when leaks spillages and overflows occur Along with thinking about preventive measures and device caretaking License to Spill examines how water resistant and waterproofed technologies through their design and marketing imagine the brawniest and hardiest of users meant to punish and abuse their tough devices granting them unfettered permission to get wet Examining a long history of torture testing and hyperbolic claims of imperviousness the book demonstrates how protective designs relate to broader cultural ideas about media use as sporty luxurious excessive or messy This context is especially relevant given that the market for water resistant bags cases coatings and seals has flourished over the past decade with new rhetoric about wetness as natural and digital technologies as ever present The book pushes us to attend to both the ideals and problems that arise when designing resilient devices ranging from the right to repair movement and lawsuits over ingress protection IP ratings to obsolescence culture and work from home activities in the wake of the COVID 19 pandemic

**Secondhand** Adam Minter, 2019-11-12 Revelatory terrifying but ultimately hopeful Elizabeth Kolbert Pulitzer Prize winning author of THE SIXTH EXTINCTION From the author of Junkyard Planet a journey into the surprising afterlives of our former possessions Downsizing Decluttering Discarding Sooner or later all of us are faced with things we no longer need or want But when we drop our old clothes and other items off at a local donation center where do they go Sometimes across the country or even halfway across the world to people and places who find value in what we leave behind In Secondhand journalist Adam Minter takes us on an unexpected adventure into the often hidden multibillion dollar industry of reuse thrift stores in the American Southwest to vintage shops in Tokyo flea markets in Southeast Asia to used goods enterprises in Ghana and more Along the way Minter meets the fascinating people who handle and profit from our rising tide of discarded stuff and asks a pressing question In a world that craves shiny and new is there room for it all Secondhand offers hopeful answers and hard truths A history of the stuff we've used and a contemplation of why we keep buying more it also reveals the marketing practices design failures and racial prejudices that push used items into landfills instead of new homes

Secondhand shows us that it doesn't have to be this way and what really needs to change to build a sustainable future free of excess stuff
