Handbook of Port Machinery Dexin Tao, Yunfu Yan, Dashan Dong, Dewen Zhang, 2024-03-19 The CCMS Handbook of Port Machinery is an extensive reference guide intended to meet the needs of port handling machinery users and port planning and design institutes with regard to equipment selection equipment application and maintenance management It comprehensively and systematically introduces readers to the characteristics classification structure working principles main technical performance parameters corresponding technical standards and matters requiring special attention in equipment selection for typical port handling machinery The handbook supplements relevant handbooks on port machinery product design specifications and provides essential technical guidance to help users fully understand and correctly select port machinery and equipment At the same time it offers a valuable resource for technical personnel university teachers and students who are engaged in port planning and design handling process design port machinery product design port machinery use and maintenance A comprehensive guide to port handling machinery it reflects the current state of development and application status of port machinery in China Embedded Systems: An Integrated Approach LyLa B. Das, 2012 Embedded Systems An Integrated Approach is exclusively designed for the undergraduate courses in electronics and communication engineering as well as computer science engineering This book is well structured and covers all the important processors and their applications in a sequential manner It begins with a highlight on the building blocks of the embedded systems moves on to discuss the software aspects and new processors and finally concludes with an insightful study of important applications This book also contains an entire part dedicated to the ARM processor its software requirements and the programming languages Relevant case studies and examples supplement the main discussions in the text *Springer Handbook of Atmospheric Measurements* Thomas Foken, 2021-11-09 This practical handbook provides a clearly structured concise and comprehensive account of the huge variety of atmospheric and related measurements relevant to meteorologists and for the purpose of weather forecasting and climate research but also to the practitioner in the wider field of environmental physics and ecology The Springer Handbook of Atmospheric Measurements is divided into six parts The first part offers instructive descriptions of the basics of atmospheric measurements and the multitude of their influencing factors fundamentals of quality control and standardization as well as equations and tables of atmospheric water and soil quantities The subsequent parts present classical in situ measurements as well as remote sensing techniques from both ground based as well as airborne or satellite based methods The next part focusses on complex measurements and methods that integrate different techniques to establish more holistic data Brief discussions of measurements in soils and water at plants in urban and rural environments and for renewable energies demonstrate the potential of such applications The final part provides an overview of atmospheric and ecological networks Written by distinguished experts from academia and industry each of the 64 chapters provides in depth discussions of the available devices with their specifications aspects of

quality control maintenance as well as their potential for the future. A large number of thoroughly compiled tables of physical quantities, sensors and system characteristics make this handbook a unique, universal and useful reference for the practitioner and absolutely essential for researchers, students and technicians.

Introduction to GNSS Geodesy Clement A. Ogaja, 2022-05-24. Introduction to GNSS Geodesy is a concise reference for beginners and experts in GNSS based satellite geodesy. It covers all of the important concepts in almost a third of the space of the other GNSS books. The book begins with a case study in Augmented Reality to set the stage for what is to come and then moves on to the key elements of GNSS geodesy that make accurate and precise geopositioning possible. For example, it is important to understand the geodetic reference systems and the associated GNSS data processing strategies that enable both accurate and high precision geopositioning. Chapter 2 gives an overview of GNSS constellations and signals, highlighting important characteristics. Chapter 3 then introduces reference systems in geodesy, covering such topics as time systems, geodetic datums, coordinate systems, coordinate conversions and transformations, and the International Terrestrial Reference Frame. This lays the framework for the rest of the book. Chapters 4 and 5 dig deep into mathematical formulation of GNSS parameter estimation and observation models. All the concepts are presented clearly and concisely with diagrams to assist reader comprehension. Chapter 6 describes Continuously Operating Reference Station (CORS) networks and their role in geodesy and definition of reference frames. Various global and regional CORS networks are presented in this section. The chapter also covers GNSS data and common formats such as RINEX and RTCM. Chapter 7 introduces the whole cycle of GNSS data processing, including preprocessing, ambiguity fixing and solution reprocessing methods as commonly used in both epoch solutions and time series data. The book concludes with appendices on orbit modelling, GNSS linear combinations, application examples and an example linear model.

Online Journalism Steve Hill, Paul Lashmar, 2013-12-10. An essential guide for anyone hungry to learn how journalism should be practised today and will be tomorrow. Hill and Lashmar encapsulate the transformative impact technology is having on journalism but anchor those changes in the basic principles of reporting. Paul Lewis, The Guardian. As the news business transforms, Online Journalism is a fantastic new resource for both students and lecturers. Informative, straightforward and easily digested, it's a one-stop shop for the skills, knowledge, principles and mindset required for journalistic success in the digital age. Mary Braid, Kingston University Online. And social media have become indispensable tools for journalists, but you still have to know how to find and tell a great story. To be a journalist today, you must have not only the practical skills to work with new technologies but also the understanding of how and why journalism has changed. Combining theory and practice, Online Journalism: The Essential Guide will take you through the classic skills of investigating, writing and reporting as you master the new environments of mobile, on-demand, social, participatory and entrepreneurial journalism. You will also develop must-have skills in app development for smartphones and tablets as well as techniques in podcast, blog and news website production. What this book does for you: Tips and advice from leading industry experts in their

own words QR codes throughout the book to take you straight to multimedia links A fully up to date companion website loaded with teaching resources detailed careers advice and industry insights Exercises to help you hone your skills Top five guided reading list for each topic so you can take it further Perfect for students throughout a journalism course this is your essential guide **Green, Pervasive, and Cloud Computing** Xinyi Huang, Yang Xiang, Kuan-Ching Li, 2016-05-02 This book constitutes the refereed proceedings of the 8th International Conference on Grid and Pervasive Computing GPC 2016 held in Seoul Korea in May 2016 The 20 revised papers were carefully reviewed and selected from 94 submissions The conference contains various aspects including green computing cloud computing virtualisation data and storage and network security

Official Gazette of the United States Patent and Trademark Office ,2002 Convergence and Hybrid Information Technology Geuk Lee, Daniel Howard, Dominik Ślęzak, 2011-09-14 This book constitutes the refereed proceedings of the 5th International Conference on Convergence and Hybrid Information Technology ICHIT 2011 held in Daejeon Korea in September 2011 The 85 revised full papers presented were carefully reviewed and selected from 144 submissions The papers are organized in topical sections on communications and networking motion video image processing security systems cloud RFID and robotics industrial application of software systems hardware and software engineering healthcare EEG and e learning HCI and data mining software system and its applications **EU Competition Law** Ariel Ezrachi, 2021-08-12 This book should be in the library of every competition law practitioner and academic The summary of cases is first class But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decisions but also some of the leading cases from the US and European Member States Ali Nikpay Gibson Dunn Crutcher LLP This unique book is designed as a working tool for the study and practice of European competition law focused on case law analysis Each chapter begins with an introduction which outlines the relevant laws regulations and guidelines for each of the topics setting the analytical foundations for the case entries Within this framework cases are reviewed in summary form accompanied by useful analysis and commentary The 7th edition includes recent judgments from the European Court of Justice on the scope of object and effects based analysis including Generics and Budapest Bank as well as those on abuse of dominance It examines developments in parallel trade online sales restrictions advertising bans enforcement powers and procedure Expanding its coverage of merger decisions it explores non collusive oligopoly including CK Telecoms and the treatment of innovation and data under the EU Merger Regulation This unique book offers the practitioner and competition law student an insightful guide to EU competition law cases an understanding of which is crucial Rigorous comprehensive and authoritative it simply is a must read Virtual, Augmented and Mixed Reality Stephanie Lackey, Jessie Chen, 2017-06-28 This book constitutes the refereed proceedings of the 9th International Conference on Virtual Augmented and Mixed Reality VAMR 2017 held as part of HCI International 2017 in Vancouver BC Canada HCII 2017 received a total of 4340 submissions of which 1228 papers were accepted for publication after a careful reviewing

process The 45 papers presented in this volume were organized in topical sections named developing virtual and augmented environments interaction techniques in VAMR VAMR in education and training virtual worlds and games user experience in VAMR and health issues in VR

Circular Business Models in the Mobile Phone Industry David Watson, Anja Charlotte Gylling, Naoko Tojo, Harald Throne-Holst, Bjørn Bauer, Leonidas Milios, 2017-11-30 The circular economy offer opportunities to reduce resource use and waste whilst providing business opportunities This is also true in the mobile phone industry that has been characterised by high rates of product obsolescence The emergence of the smart phone has changed the landscape making repair refurbishment and resell attractive to businesses and consumers Moreover emerging modular phone design should allow functional upgrades with low resource wastage This report investigates the adoption of circular business models within Nordic markets Producers retailers refurbishers recyclers and resellers tell of their motivation experiences and the challenges that they face A special look is taken at consumer and waste law and the challenges and opportunities they represent The report ends with 17 policy proposals that can accelerate the adoption of circularity in the sector
