Big Idea 1

1. What are the parts of the Scientific Method? **Ask a Question, Form a Hypothesis, Test the Hypothesis, Analyze the Results, Draw Conclusions, Communicate Results**

2. Why is it important for scientific investigations to be replicable? **So that others can repeat and show accuracy**

3. What is the difference between the three different types of scientific investigations? (research, observation, experimentation)

Research: looking for or receiving information from a reliable source.

Observation: Using your senses to collect data.

Experimentation: Perform steps of an experiment.

4. What would scientists do if they concluded different results during a scientific investigation?

Check for mistakes, help in construction a reasonable explanation, repeat the investigation to verify results, new insight into the original question, share knowledge and information, ask new questions, form new hypotheses, and inspire new investigations and discoveries.

(discuss, compare, analyze, negotiate)

5. What are two ways that science involves creativity? **Designing an experiment and create explanations that fit evidence.**

6. What does durable mean? **To be able to last a long time such as concepts in science because they are heavily researched and supported by empirical evidence.**

Big Idea 2
