Innovate to Dominate Tai Ming Cheung, 2022-08-15 *Innovate to Dominate* Tai Ming Cheung offers insight into why how and whether China will overtake the United States to become the world's preeminent technological and security power. This examination of the means and ends of China's quest for techno security supremacy is required reading for anyone looking for clues as to the long term direction of the global order. The techno security domain Cheung argues is where national security innovation and economic development converge and it has become the center of power and prosperity in the twenty first century. China's paramount leader Xi Jinping recognizes that effectively harnessing the complex interactions among security innovation and development is essential in enabling China to compete for global dominance. Cheung offers a richly detailed account of how China is building a potent techno security state. In *Innovate to Dominate* he takes readers from the strategic vision guiding this transformation to the nuts and bolts of policy implementation. The state led top down mobilizational model that China is pursuing has been a winning formula so far but the sternest test is ahead as China begins to compete head to head with the United States and aims to surpass its archrival by mid century if not sooner. *Innovate to Dominate* is a timely and analytically rigorous examination of the key strategies guiding China's transformation of its capabilities in the national technological military and security spheres and how this is taking place. Cheung authoritatively addresses the burning questions being asked in capitals around the world. Can China become the dominant global techno security power? And if so when?

Foundations of Islāmic Psychology G. Hussein Rassool, Mugheera M. Luqman, 2022-08-19 *Foundations of Islāmic Psychology: From Classical Scholars to Contemporary Thinkers* examines the history of Islāmic psychology from the Islāmic Golden age through the early 21st century giving a thorough look into Islāmic psychology's origins, Islāmic philosophy and theology and key developments in Islāmic psychology. In tracing psychology from its origins in early civilisations, ancient philosophy and religions to the modern discipline of psychology, this book integrates overarching psychological principles and ideas that have shaped the global history of Islāmic psychology. It examines the legacy of psychology from an Islāmic perspective, looking at the contributions of early Islāmic classical scholars and contemporary psychologists and to introduce how the history of Islāmic philosophy and sciences has contributed to the development of classical and modern Islāmic psychology from its founding to the present. With each chapter covering a key thinker or moment and also covering the globalisation of psychology, the Islāmisation of knowledge and the decolonisation of psychology, the work critically evaluates the effects of the globalisation of psychology and its lasting impact on indigenous culture. This book aims to engage and inspire students taking undergraduate and graduate courses on Islāmic psychology to recognise the power of history in the academic studies of Islāmic psychology to connect history to the present and the future and to think critically. It is also ideal reading for researchers and those undertaking continuing professional development in Islāmic psychology, psychotherapy and counselling.

Fanon, Frantz, and the Violence of Resistance Zahi Zalloua, 2025-06-26 In a novel pairing of anti colonial

theorist Frantz Fanon with Marxist Lacanian philosopher Slavoj Žižek Zahi Zalloua explores the ways both thinkers expose the violence of political structures This inventive exploration advances an anti racist critique describing how ontology operates in a racial matrix to produce some human bodies that count and others deemed not quite or non human that do not For Fanon and Žižek the violence of ontology must be met with another form of violence a revolutionary violence that delegitimizes the logic of the symbolic order and troubles its collective fantasies Whereas Fanon begins his challenge to ontology by exposing its historical linkages to Europe's destructive imperialist procedures before proceeding to stretch Marxism along with psychoanalysis to account for the crushing neo colonial situation Žižek premises his work on the refusal to accept the totality of ontology Because of these different points of intervention Fanon and Žižek together offer a powerful and multifaceted assessment of the liberal anti racist paradigm whose propensity for identity politics and aversion to class struggle silence the cry of the dispossessed and foreclose radical change Avoiding contemporary separatist temptations decoloniality and Afropessimism and breaking with a non violent sentimentalist futurology that announces more of the same Fanon and Žižek point in a different direction one that eschews identitarian thought in favor of a collective struggle for freedom and equality
