The Field Guide to Mixing Social and Biophysical Methods in Environmental Research Rebecca Lave, Stuart Lane, 2025-02-25

Despite ongoing debates about its origins the Anthropocene a new epoch characterized by significant human impact on the Earth's geology and ecosystems is widely acknowledged Our environment is increasingly a product of interacting biophysical and social forces shaped by climate change colonial legacies gender norms hydrological processes and more Understanding these intricate interactions requires a mixed methods approach that combines qualitative and quantitative biophysical and social research However mixed methods environmental research remains rare hindered by academic boundaries limited

training and the challenges of interdisciplinary collaboration Time funding and the integration of diverse data further complicate this research whilst the dynamics and ethics of interdisciplinary teams add another layer of complexity Despite these challenges mixed methods research offers a more robust and ultimately transformative understanding of environmental questions This Field Guide aims to inspire and equip researchers to undertake such studies Organized like a recipe book it assists researchers in the preparation of their field work as well as offering entry points to key methods and providing examples of successful mixed methods projects This book will be of interest to scholars wishing to tackle environmental research in a more holistic manner spanning sister disciplines such as anthropology statistics political science public health archaeology geography history ecology and Earth science

Geographic Thought Tim Cresswell, 2024-02-05 An accessible and engaging introduction to geographic thought In the newly expanded Second Edition of *Geographic Thought A Critical Introduction* renowned scholar Tim Cresswell delivers a thoroughly up to date and accessible examination of the major thinkers and key theoretical developments in the field Coverage of the complete range of the development of theoretical knowledge from ancient geography to contemporary theory appears alongside treatments of the influence of Darwin and Marx the emergence of anarchist geographies the impact of feminism and myriad other central bodies of thought This latest edition also includes new chapters on physical geography and theory postcolonialism and decoloniality and black geographies The author emphasizes the importance of geographic thought and its relevance to our understanding of what it means to be human and to the people places and cultures of the world in which we live This new edition contains New examples throughout consisting of contemporary research from a wider range of geographical contexts and by geographers from diverse backgrounds Comprehensive explorations of physical geography that combine updated coverage from the first edition with brand new material Updated discussions of spatial science and quantitative methods that include considerations of the role of place and specificity in quantitative work In depth examinations of the Anthropocene the uses of assemblage theory and the emergence of the GeoHumanities Perfect for students of undergraduate and graduate courses in geographic thought *Geographic Thought A Critical Introduction* will also earn a place in the libraries of students and scholars researching the history and philosophy of geography as well as practicing geographers

Race, Nature, and the Environment Katie Meehan, 2024-11-01 What might it mean to unsettle our disciplinary understanding of race nature and the environment This book assembles diverse voices and approaches in geographic thinking on race and racialization during an era of climate crisis toxic legacies state violence mass extinctions carceral logics and racial injustices that shape and are shaped by the re production of nature The volume advances new critical scholarship on race and racialization in Anglo American geography reflects on its uneven diffusion and unmet challenges and notes the unstoppable force of insurgent thinking abolition geography critical race theory Black and Indigenous geographies scholar activism and environmental justice praxis in taking hold and transforming the discipline Together the authors work across the vibrant fields of political

ecology and human environment geography grapple with timely questions of land water territory and place making render visible the spatial and socioecological reproduction of power and violence by capital and the state and make space for the enduring politics of struggle on multiple registers body home classroom park city community region and world Race Nature and the Environment will interest students academics and researchers in Geography who are keen to learn about disciplinary approaches and debates in relation to race racialization environmental justice and the politics of nature in a world marked by white supremacy The chapters in this book were originally published as a special issue of the Annals of the American Association of Geographers *Appletons' Journal*, 1872 **Academic Writing for Geographers** James A.

Tyner, 2023-08-21 There are many how to books on writing for academics none of these however relate specifically to the discipline of geography In this book the author identifies the principle modes of academic writing that graduate students and early career faculty will encounter specifically focusing on those forms expected of geographers that is those modes that are reviewed by academic peers This book is readily accessible to senior undergraduate and graduate students and early career faculty who may feel intimidated by the process of writing This volume is not strictly a how to or step by step manual for writing an article or book rather through the use of real concrete examples from published and unpublished works the author demystifies the process of different types of scholarly pieces geographers have to write with the specific needs and challenges of the discipline in mind Although chapters are thematic based e.g. stand alone chapters on book reviews articles and books the manuscript is structured around the concept of story telling for it is the author's contention that all writing whether a scientific study or more humanist essay is a form of story telling *Graduate Work in Mathematics in Universities and in Other Institutions of Like Grade in the United States* Arthur Coleman Monahan, George Drayton Strayer, International Commission on the Teaching of Mathematics, William Carl Ruediger, Wilson, Louis N., 1911 **Bibliography of Science Teaching** American Federation of Teachers of the Mathematical and the Natural Sciences, 1911

Eventually, you will entirely discover a new experience and finishing by spending more cash. nevertheless when? attain you consent that you require to acquire those every needs in the same way as having significantly cash? Why dont you attempt to acquire something basic in the beginning? Thats something that will guide you to understand even more just about the globe, experience, some places, bearing in mind history, amusement, and a lot more?

It is your agreed own mature to sham reviewing habit. in the midst of guides you could enjoy now is **Physical Geography Journal** below.
