FULL MEMORANDUM GRADE 12 PHYSICS 2022 FINAL

This question paper consists of 18 pages and 3 data sheets.

(QUESTION 6 (Start on a new page.)

A 12 kg block is initially at rest at point A at the bottom of a ROUGH inclined plane. The block is pulled up the incline by a constant force F acting parallel to the incline. The block reaches point B, which is at a vertical height of 4.0 m above the horizontal, with a speed of 2.0 m/s. See the diagram below.

- 6.1 Define the term non-conservative force.
- 6.2 Draw a labelled free-body diagram for the block when it is pulled up the incline.
- 6.3 Calculate the total work done on the block by the NON-CONSERVATIVE forces when the block moves from point A to point B. (5)

The same constant force F now moves the block at a CONSTANT VELOCITY across a rough horizontal surface from point B to point C, as shown below. Force F acts parallel to the horizontal surface.

The magnitude of the constant frictional force acting on the block while moving from point B to point C is 40 N, 40% less than the magnitude of the constant frictional force acting on the block when it moves from point A to point B.

- 6.4 Calculate the distance from point A to point B. (5)

Physical Science 2013 Paper1 November Memorandum

Julia Schneider

Physical Science 2013 Paper1 November Memorandum:

Yeah, reviewing a books **Physical Science 2013 Paper1 November Memorandum** could increase your close links listings. This is just one of the solutions for you to be successful. As understood, skill does not recommend that you have extraordinary points.

Comprehending as without difficulty as pact even more than new will find the money for each success. next-door to, the message as competently as perspicacity of this Physical Science 2013 Paper1 November Memorandum can be taken as with ease as picked to act.
