Change Law Daniel Bodansky, Jutta Brunnée, Lavanya Rajamani, 2017-06-08 This textbook by three experts in the field
provides a comprehensive overview of international climate change law Climate change is one of the fundamental challenges
facing the world today and is the cause of significant international concern In response states have created an international
climate regime The treaties that comprise the regime the 1992 United Nations Framework Convention on Climate Change
the 1997 Kyoto Protocol and the 2015 Paris Agreement establish a system of governance to address climate change and its
impacts This book provides a clear analytical guide to the climate regime as well as other relevant international legal rules
The book begins by locating international climate change law within the broader context of international law and
international environmental law It considers the evolution of the international climate change regime and the process of law
making that has led to it It examines the key provisions of the Framework Convention the Kyoto Protocol and the Paris
Agreement It analyses the principles and obligations that underpin the climate regime as well as the elaborate institutional
and governance architecture that has been created at successive international conferences to develop commitments and
promote transparency and compliance The final two chapters address the polycentric nature of international climate change
law as well as the intersections of international climate change law with other areas of international regulation This book is
an essential introduction to international climate change law for students scholars and negotiators **The Saturday**
