Kieffer,2013-10-21 If you are an amateur weather geek disaster wonk or budding student of earth sciences you will want to read this book Seattle Times In 2011 there were fourteen natural calamities that each destroyed over a billion dollars worth of property in the United States alone In 2012 Hurricane Sandy ravaged the East Coast and major earthquakes struck in Italy the Philippines Iran and Afghanistan In the first half of 2013 the awful drumbeat continued a monster supertornado struck Moore Oklahoma a powerful earthquake shook Sichuan China a cyclone ravaged Queensland Australia massive floods inundated Jakarta Indonesia and the largest wildfire ever engulfed a large part of Colorado Despite these events we still behave as if natural disasters are outliers Why else would we continue to build new communities near active volcanoes on tectonically active faults on flood plains and in areas routinely lashed by vicious storms A famous historian once observed that civilization exists by geologic consent subject to change without notice In the pages of this unique book leading geologist Susan W Kieffer provides a primer on most types of natural disasters earthquakes tsunamis volcanoes landslides hurricanes cyclones and tornadoes By taking us behind the scenes of the underlying geology that causes them she shows why natural disasters are more common than we realize and that their impact on us will increase

as our growing population crowds us into ever more vulnerable areas Kieffer describes how natural disasters result from changes in state in a geologic system much as when water turns to steam By understanding what causes these changes of state we can begin to understand the dynamics of natural disasters In the book s concluding chapter Kieffer outlines how we might better prepare for and in some cases prevent future disasters She also calls for the creation of an organization something akin to the Centers for Disease Control and Prevention but focused on pending natural disasters **Impact**

Panel to the Screen Drew Morton, 2016-11-28 Over the past forty years American film has entered into a formal interaction with the comic book Such comic book adaptations as *Sin City* 300 and *Scott Pilgrim vs the World* have adopted components of their source materials visual style The screen has been fractured into panels the photographic has given way to the graphic and the steady rhythm of cinematic time has evolved into a far more malleable element In other words films have begun to look like comics Yet this interplay also occurs in the other direction In order to retain cultural relevancy comic books have begun to look like films Frank Miller's original *Sin City* comics are indebted to film noir while Stephen King's *The Dark Tower* series could be a Sergio Leone spaghetti western translated onto paper Film and comic books continuously lean on one another to reimagine their formal attributes and stylistic possibilities In *Panel to the Screen* Drew Morton examines this dialogue in its intersecting and rapidly changing cultural technological and industrial contexts Early on many questioned the prospect of a low art form suited for children translating into high art material capable of drawing colossal box office takes Now the naysayers are as quiet as the queued crowds at Comic Cons are massive Morton provides a nuanced account of this phenomenon by using formal analysis of the texts in a real world context of studio budgets grosses and audience reception
